## **PART –III**

### **BID OPENING AND EVALUATION CRITERIA**

There would be three (3) stages for evaluation process. The Stages are:

- I) Eligibility Criteria Evaluation
- II) Technical Evaluation
- III) Commercial Evaluation

#### **1. ELIGIBILITY EVALUATION**

The Eligibility would be evaluated first for the participating bidders. The bidders who would qualify all Eligibility Criteria as mentioned in clause 2.1, will be shortlisted for the Technical bid evaluation. A detailed techno-commercial evaluation would be undertaken for eligible bidders.

#### **2. TECHNICAL EVALUATION**

In Technical evaluation process, the technical bid of only eligible bidders would be evaluated. The Technical evaluation will be done on the basis of comply chart provided by bidder as per Scope of work in Part IV and Technical requirements as per Annexure – Q The Bidder should comply all points in scope of work in Part IV and all technical requirements in Annexure – Q.

Non-compliance of any point either in scope of work or any technical requirements in Annexure-Q may lead to rejection from the further bidding process. After technical evaluation commercial bids of only technically qualified bidders will be opened.

Bidder has to provide link feasibility report for each & every branches as mentioned in **Annexure – V** for MPLS link on wire/RF media & MPLS link on 4G/5G (single SIM based) media separately. Along with the feasibility report bidder need to mention the status of landlord permission obtained from Branch during this activity.

The Technical evaluation will be done on the basis of comply chart provided by bidder as per Scope of work in Part IV and Technical requirements as per **Annexure – Q**.

#### **3. COMMERCIAL EVALUATION**

The Commercial Bids of only technically qualified bidders will be opened and evaluated by the Bank and the evaluation will take into account the following factors:

- a. The **Bill of Material** must be attached in Technical Proposal as well as Commercial Bid. The format will be identical for both Technical Proposal and Commercial Proposal, except that the Technical Proposal should not contain any price information (**Annexure- R with Prices masked**). Technical Proposal without **masked Bill of Materials & masked Commercial Template** will be liable for rejection. Any deviations from the Bill of material/ non submission of prices as per the format shall make the bid liable for rejection.
- b. The L1 Bidder will be selected on the basis of the amount quoted for proposed solution quoted by them as per **Annexure-S**. The commercial bids for categories A & B will be evaluated separately and L1, L2 & L3 for Category A and L1 & L2 for category B shall be selected.
- c. The optimized TCO (Total Cost of Ownership) identified in the commercial bid would be the basis of the entire outflow of the Bank for undertaking the scope of work. Any further hardware, software, licenses required to meet the performance criteria of the Bank as stated in the RFP, during the tenure of the project, would be at the cost of the Bidder.
- d. The bidder will be solely responsible for complying with any applicable Export / Import Regulations. The Bank will no way be responsible for any deemed Export benefit that may be available to the bidder.
- e. In case there is a variation between numbers and words; the value mentioned in words would be considered.
- f. In the event the vendor has not quoted or mentioned the component or services required, for evaluation purposes the highest value of the submitted bids for that component or service would be used to calculate the TCO. For the purposes of payment and finalization of the contract, the value of the lowest bid would be used.
- g. **In the event the bidder is not feasible for Category A or B links for all branches, for evaluation purposes the highest cost of link for that category of link, if any, in the submitted bids would be used to calculate the TCO. For the purposes of payment and finalization of the contract, the value of the lowest bid would be used.**

Example:

Total no. of sites – 100

Bidder A Quote:

Feasible – 30@ Rs. 100 per site

Non feasible – 70

Bidder B Quote:

Feasible – 50@ Rs. 110 per site

Non feasible – 50

Bidder C Quote:

Feasible – 25@ Rs. 90 per site

Non feasible – 75

Bidder D Quote:

Feasible – 70@ Rs. 90 per site

Non feasible – 30

From Above, Highest quotation for a link – Rs. 110, therefore, TCO will be arrived as follows:

	Bidder A		Bidder B		Bidder C		Bidder D	
	Feasible	Non Feasible						
<b>No. of Sites</b>	30	70	50	50	25	75	70	30
<b>Price per link for feasible location</b>	100		110		90		90	
<b>Total Cost for feasible links (A)</b>	3000		5500		2250		6300	
<b>Price per link for non-feasible location</b>		110		110		110		110
<b>Total Cost for non-feasible links (B)</b>		7700		5500		8250		3300
<b>TCO (A + B)</b>	10700		11000		10500		9600	
<b>Evaluation</b>	L3		L4		L2		L1	

- h. In case there is a variation in value between numbers and words; the value mentioned in words would be considered.

- i. In case more than one bidder(s) are evaluated with equal TCO, bidder with highest no. of feasible sites will be given precedence over other bidder (for same TCO)

The Bidder needs to provide unit costs for link and services; unit rates with applicable taxes including GST would be considered for the TCO calculation purposes.

Bank will finalize the L1 bidder based on the TCO of each category of link quoted by the bidder in **Annexure "S"**, having the following terms and conditions:

- I. Bidders to strictly quote in the format and for periods as mentioned above.
- II. L1 bidder would be determined based on the total cost of ownership of that category.
- III. No counter condition/assumption in response to commercial bid will be accepted. Bank reserves the right to reject such bid.
- IV. The requirement of links at branches are indicative for the TCO calculation. However, it may vary depending upon the Bank's requirement.
- V. The Bank reserves the right to decrease or increase the no. of branches up to 25% (Twenty-Five percent) of the projected no. of branches with the bidder/s at the agreed price, terms and conditions during the contract period. Any decision of Bank in this regard shall be final, conclusive and binding on the bidder

#### **4. NORMALIZATION OF BIDS:**

The Bank has discretion to go through a process of Eligibility evaluation followed by the technical evaluation and normalization of the bids to the extent possible to ensure that eligible bidders are more or less on the same technical ground. After the normalization process, if the Bank feels that any of the bids needs to be normalized and that such normalization has a bearing on the price bids; the Bank may at its discretion ask all the eligible bidders to re-submit the technical and commercial bids once again for scrutiny.

The resubmissions can be requested by the Bank in the following two manners:

- Incremental bid submission in part of the requested clarification by the Bank.
- Revised submissions of the entire bid in the whole.

The Bank can repeat this normalization process at every stage of bid submission or till the Bank is satisfied. The eligible bidder/s have to agree that they have no reservation or objection to the normalization process and all the technically short

listed bidders will, by responding to this RFP, agree to participate in the normalization process and extend their co-operation to the Bank during this process. The shortlisted bidder/s, by submitting the response to this RFP, agrees to the process and conditions of the normalization process.

## **5. SHORTLISTING**

The bidder needs to qualify as per eligibility criteria. Only eligible bidders will be qualified for the Technical evaluation process, to be qualified for commercial bid opening. Only those bidders who achieve technical requirements mentioned in scope of work would be short-listed for commercial bid evaluation.

The Commercial Bids of only technically qualified bidders will be opened and evaluated by the Bank and the evaluation will take into account the following factors:

- a)** The TCO identified in the commercial bid would be the basis of the entire outflow of the Bank for undertaking the scope of work. The Bank will consider the TCO over a three year period starting from the date of Purchase order.
- b)** The bidder will be solely responsible for complying with any applicable Export / Import Regulations. The Bank will no way be responsible for any deemed Export benefit that may be available to the bidder.
- c)** In case there is a variation between numbers and words; the value mentioned in words would be considered.
- d)** In the event the vendor has not quoted or mentioned the component or services required, for evaluation purposes the highest value of the submitted bids for that component or service would be used to calculate the TCO. For the purposes of payment and finalization of the contract, the value of the lowest bid would be used.

## PART –IV

### SCOPE OF THE WORK

The scope of services for the Supply, Commissioning, maintenance & Management of category **A & B** type of link at branches is as follows:

#### **FOR ALL CATEGORIES OF LINKS**

- 4.1.1** Bidder should provide feasibility report last mile on Wire/RF & 4G/5G (Single SIM Based) separately for branches as per list mentioned in **Annexure – V**. The links will be used either as primary or as back up of existing MPLS links from BSNL/MTNL/Sify/JIO/Airtel/Others links with load sharing and Auto-failover option.
- 4.1.2** Bidders shall have to submit proposed MPLS link feasibility report for category A & B link for all branches separately. Desktop feasibility will not be accepted.
- 4.1.3** The bidders are expected to do a site survey for feasibility and for installation of the required equipments. They should clearly mention the required equipment/s that will be deployed during commissioning. The charges towards network equipments, accessories, cabling & other activities should be included in the cost of link.
- 4.1.4** Any deviation with respect to feasibility report submitted such as wired to wireless, increase in pole height, declared as feasible, etc. but later during the implementation of the project found to be non-feasible, will not be accepted. The selected bidder shall be penalized for the deviation.
- 4.1.5** Bidder should provide connectivity through wire line or stable wireless media meeting the bandwidth, latency, uptime, secured connectivity aspects etc. and other requirement mentioned in this RFP.
- For the branches where MPLS on Wired/RF is not feasible at all, Bank may decide to go for 4G/5G (Single SIM Based) as last mile.
- 4.1.6** The prospective bidder shall establish the VPN Network and should be capable of maintaining it for a **period of at least 3 years**, based upon performance, Bank may extend the contract for further period on same terms and conditions on mutually agreed prices.

- 4.1.7** For Category A & B - link provided by bidder should be fully isolated from Internet traffic even if running on the same core/backbone. It is desired that same PE Router does not run both customer VPN traffic and Internet traffic. The VPN network offered to the Bank should not carry any internet routes. The bidder has to provide network topology showing how internet traffic is segregated from proposed MPLS cloud.
- 4.1.8** Branches connected through offered MPLS link should communicate each other directly without coming to Data Centre i.e. any to any communication.
- 4.1.9** Selected bidder should provide connectivity with minimum number of "hop" for all links.
- 4.1.10** Bank expects minimum number of hop count while routing packets through network.
- 4.1.11** All the POPs from where the bandwidth is provided to Bank should have redundancy of equipments, links, power, backhaul connectivity etc. Bidder should submit an undertaking for the same.
- 4.1.12** The network of bidder should not be linked with any type of network from BSNL/MTNL at core / distribution / access / last mile level at any location.
- 4.1.13** The backhaul link to be terminated at Bank's data center at Bangalore & Disaster Recovery Center at Kolkata should be of Optical Fiber media only with self-healing ring based architecture. The last mile should be coming via two different physical paths. **A diagram showing path redundancy at our data center should be submitted with technical bid.** Any cross-connect charges, if required to terminate the link at our Bangalore & Kolkata Data center, will be borne by the selected bidder.
- 4.1.14** The bandwidth of backhaul link is factored as 20 Mbps and bidder to quote the cost of the same in commercial bid. Bank shall place order for backhaul in tranche of 20 Mbps as per the requirement. For existing vendor, existing Backhaul Links to be utilized which may be upgraded as per requirement at mutually agreed terms. Bidder shall ensure to upgrade the bandwidth of DC and DR backhaul links to minimum 2 times of bandwidth (i.e. 2 times of (Total links X 2 Mbps)) during the contract period at any point of time. Necessary network devices such as Router/Mux/Rack along with necessary cabling and Battery Backup as per Industry Standard to be provided by Bidder without any additional cost.

Note: The existing empanelled service providers, who participates in this process and have already provided the Backhaul links for the branch connectivity under previous contracts and intended to use the existing backhaul links under this project, can augment the capacity of existing backhaul proportionately with the count of branches/links which are commissioned under this RFP with the prior consent of Bank. Bank can further investigate such proposals/ solution as per the Information security norms and may take decision accordingly.

However, if additional backhaul bandwidth is required for running the branches under this RFP Bank shall place order with the selected bidder in tranche of 20 Mbps. Further, Bank shall pay the cost of Backhaul bandwidth based upon the lowest rate between the existing (with which Bank is paying currently to the respective vendor) and the discovered rate (from this RFP).

**4.1.15** For Category A & B, the connectivity provided by the bidder has to be Layer 3 MPLS solution on dedicated ports with **1:1** full duplex committed information rate with end point as Ethernet. The circuit should be available in full duplex mode with sending and receiving available on the same circuit. (For e.g. - On a 2 Mbps circuit, 2 Mbps sending and 2 Mbps receiving should be possible simultaneously).

**4.1.16** The selected bidder shall provide committed bandwidth at each location and make it available continuously. Bidder should ensure that committed bandwidth subscribed by Bank is always available for use. Bank may test the load on the links from time to time. In case of bandwidth subscribed by the branch is not available at any time, the duration of non-availability of committed bandwidth will be treated as downtime of the link. Penalty on downtime will be enforced accordingly.

**4.1.17** The bidder is required to specify if bursting is available as a supported service. If so, bidder may define the process and specify the lead- times for requesting bursts. The bidder may also confirm the flexibility to dynamically allocate bandwidth to the Bank on demand either on a permanent or temporary basis.

**4.1.18** A separate VPN is to be created only for Bank network and in no way the VPN should be shared with other customers sharing the MPLS backbone. Bank MPLS Network must be accessible to Bank nodes only. Bank has implemented IPSEC VPN in its existing network. Bank will also run IPSEC VPN on this MPLS link and there should not be any dependency from bidder/ bidder on this implementation while integrating their MPLS network. Further,
