यूको बैंक UCO BANK

Only authorized representatives of bidder will be allowed to attend the Pre-bid meeting.

1.7 Consortium and System Integrator

The Network Facility Manager's may form a consortium and bid for the RFP document , as it is the Bank's expectation to maintain, implement and refresh the most appropriate hardware and software products and maintain policies and procedures to serve the Bank. However, in this case the Bank will deal with only the Network Facility Manager as a single point of contact who shall have the sole responsibility for the entire assignment irrespective of the fact that it is only the part of the consortium. Each consortium shall name the Network Facility Manager who shall have the single point responsibility for the consortium in their bid responses. The Network Facility Manager which shall have the single-point responsibility of the bid will be deemed to be the system integrator and will be deemed to play the lead role in the bid and shall have single point responsibility of the bid. The bid would be a consortium bid if:

1.7.1 The Network Facility Manager is proposing (as part of the solution) some products, which are not owned by the Network Facility Manager;

1.7.2 The Network Facility Manager is proposing (as part of the solution) some services which are provided on behalf of another Network Facility Manager; or

1.7.3 The Network Facility Manager is proposing a product on behalf of another Network Facility Manager.

1.7.4 In the case of a Consortium, the following rules will be applicable:

- The Network Facility Manager is required to provide proof that the Network Facility Manager is authorized to bid with the products that it does not own. This may be in the form of a (copy of) letter authorizing the Network Facility Manager from a duly constituted attorney and / or a (copy of) back-to-back agreement between the concerned parties.

- The responsibility for the details presented in the responses will be with the Network Facility Manager, which will form part of the final legal contract. The Network Facility Manager will be totally responsible for delivering contractual services end to end and will be a single point of contact; and

- The responsibility for the commercial bid lies with the Network Facility Manager. The Bank would only deal with one party (the Network Facility Manager) on all commercial and legal matters.

- The consortium Network Facility Manager's cannot change once the Technical and Financial bid has been submitted in response to the scope document by the Network Facility Manager.

- It is expressly clarified that even in the case of a Consortium, the selected Network Facility Manager shall have the single-point responsibility/liability to ensure the fulfilment of all obligations of the Network Facility Manager under the contract.

- Should the Network Facility Manager wish to change any of the partners as part of this consortium we will levy a penalty of 5% for that component for the change. The Network Facility Manager has to quote only partner for each component and multiple partner names quoted for a certain component or service will not be accepted by the bank.

1.8 Modification and Withdrawal of Bids

No bid can be modified by the bidder subsequent to the closing date and time for submission of bids. In the event of withdrawal of the bid by successful bidders, the EMD will be forfeited by the Bank.

Part –III

3.1 Evaluation Criteria

The objective of evolving this evaluation methodology is to facilitate the selection of the most quality-sum-cost effective solution that appropriately meets the requirements of the Bank as identified in this RFP.

There would be a three (3) stage evaluation process.

The Stages are:

I) Eligibility Criteria Evaluation
II) Technical Evaluation
III) Commercial Evaluation

3.1.1 Eligibility

The Eligibility would be evaluated first for the participating bidders. The bidders who would qualify all Eligibility Criteria as mentioned in clause 2.1, will be shortlisted for the Technical bid evaluation. A detailed techno-commercial evaluation would be undertaken for eligible bidders.

यूको बैंक UCO BANK

3.1.2 Technical Evaluation

In Technical evaluation process, the technical bid of only eligible bidders as per Eligibility Criteria in Part II, Clause 2.1 would be evaluated. The Technical evaluation will be done on the basis of comply chart provided by bidder as per Scope of work in Part IV and Technical requirements as per Annexure – G. The Bidder should comply all points in scope of work in Part IV and all technical requirements in Annexure – G.

Non-compliance of any point either in scope of work or any technical requirements in Annexure-G may lead to rejection from the further bidding process. After technical evaluation commercial bids of only technically qualified bidders will be opened.

3.1.3 Commercial Evaluation

The Commercial Bids of only technically qualified bidders will be opened and evaluated by the Bank and the evaluation will take into account the following factors:

3.1.3.1 **The L1 Bidder will be selected on the basis of the amount quoted for proposed solution as per Annexure-K**

3.1.3.2 The bidder will be solely responsible for complying with any applicable Export / Import Regulations. The Bank will no way be responsible for any deemed Export benefit that may be available to the bidder.

3.1.3.3 In case there is a variation in value between numbers and words; the value mentioned in words would be considered.

3.1.3.4 The Bidder needs to provide Unit costs for components and services; unit rates with applicable taxes would be considered for the TCO purposes.

3.1.3.5 In the event the vendor has not quoted or mentioned the component or services required, for evaluation purposes the highest value of the submitted bids for that component or service would be used to calculate the TCO. For the purposes of payment and finalization of the contract, the value of the lowest bid would be used.

यूको बैंक UCO BANK

PART –IV SCOPE OF WORK

Bank Wide Corporate Network comprising of branches, extension counters, Zonal Offices, Head Office, other corporate offices, BDC, KDC and Other network interface with third parties. The bidder is expected to maintain the WAN for the Bank. The bidder will provide for the management of the entire WAN including managing network connection devices such as routers, switches, Firewall, IPS/IDS, VPN devices etc. and all types of network links such as MPLS, leased line, ISDN, CDMA and VSAT as also migration /up-gradation/ implementation- of the Network Links. Management includes proactive monitoring, performance management, problem management and change management and everything else necessary for effective functioning of the WAN as per the service levels. The bidder is expected to liaison with the third party, government authorities etc. as and when required. The bidder shall be required to obtain the various permissions from the necessary agencies and liaise with the various Bank's respective telecommunication Service Providers for obtaining the necessary clearances and infrastructure for the WAN.

BDC – KDC Network Connectivity

There are two no. of 84 Mbps point to point link from M/s TCL & M/s BSNL between BDC and KDC used for replication. DC & DR also have 84 Mbps of MPLS backhaul MPLS link from M/s BSNL for branches connectivity. DC & DR also have backhaul MPLS link from M/s TCL & M/s Sify for international Branches.

Network Connectivity at Branches

i) There are 3100+ branches, out of which 500+ locations are connected over the VSAT Network only.
ii) 2500+ branches links are connected to DC & DR site through MPLS link provided by BSNL.
iii) 1000+ Branches have BSNL MPLS backed up by ISDN
iv) 450+ Branches have MPLS backed up by CDMA
v) 450+ Branches have MPLS backed up by VSAT
vi) 120++ Branches have MPLS backed up by MPLS link by alternate service provider.
vii) 50+ branches are co-located with other network branches/offices
viii) 100+offsite ATMs are connected with MPLS.
ix) 130+ offsite ATMs are connected with VSAT.
x) Head Offices, Zonal Office and training centers are connected with MPLS link.

xi) ATM Switch is connected from BDC and KDC through MPLS to Euronet Mumbai & Chennai datacenter using 4 Nos. of TCL link and 3 Nos of Sify link should be managed by bidder.

xii) 4 NO. Of international branches are connected through M/s TCL & M/s Sify MPLS Link with Data Centre.

Other Details

i) M/s BSNL is primary MPLS, ISDN & CDMA service provider. Backhaul link for BSNL MPLS link & CDMA connectivity should be managed by bidder.

ii) Secondary MPLS form alternative service providers like M/s Reliance and M/s Sify.

iii) Hughes and Tata Net are the VSAT Network Service Providers. Existing VSAT Pooled bandwidth is 18 Mbps full duplex (1:1) from M/s Hughes and 1 Mbps full duplex (1:1) from M/s Tatanet. Backhaul link between VSAT service provider to Bank DC & DR should be managed by bidder.

iv) Reliance and Sify are the Network Service Providers for connecting RBI (IDRBT) at KDC and Treasury Branch Mumbai.

v) Reliance & Airtel link at DC and Reliance at DR site with NPCI.

vi) Reliance and TCL link at Mumbai Treasury for Western Grid CTS should be manage by bidder.

vii) There are 1 x 10 Mbps internet links at BDC, and 1 x 6 Mbps internet link at KDC for Internet Banking; Tata Communications Limited is the internet service provider at BDC and KDC should be manage by bidder.

Bank seeks the services of the Network facility manager for providing Network related Managed services. As per the service the bidder has to deploy specialized onsite network team at Bank DC & DR and 20 ZO locations **(Annexure-H)** to manage the network with Network Management Tools to be provided by Bank. The onsite team has to manage network & security devices with comprising of lease lines, ISDN lines, VSAT, CDMA and MPLS lines etc. ensuring high uptime as per the SLA's defined in the RFP. All type of links (except backup VSAT/MPLS link from M/s Sify or M/s Reliance at branches) mentioned in Annexure L should be managed & monitor by bidder.

4.1 Summary of the Requirement

Following are the services required by Bank which will be provided by the bidder:

i) Support the Wide Area Network infrastructure of Bank across India and overseas.
ii) Monitoring and management of WAN network using NMS tools.
iii) Configuration and fault management for the routers, switch, Firewall, IPS/IDS, VPN devices etc.
iv) Support services for routers, switch, and security devices at the core distribution and access WAN locations.
v) Support services for BSNL/MTNL MPLS, lease lines, ISDN lines, CDMA, Internet VPN, 84 Mbps point to point link & 16 Mbps MPLS backhaul link form TCL.
vi) Support service for ATM Switch is connected from BDC and KDC through MPLS to Euronet Mumbai & Chennai datacenter using 4 Nos. of TCL link and 3 Nos of Sify link.

vii) Support service for 2 no. of M/s Reliance and 1 no. of M/s TCL link at Mumbai Treasury for Western Grid CTS.

viii) AMC of network equipment at DC, DR site, Head Offices, Zonal Offices, Branches as per Annexure -L

Bank also have link (MPLS & VSAT) form other service (Except BSNL/MTNL). For said links monitoring Bank already have support team from respective service provider. Bidder should coordinate with ISP support team of link implementation, troubleshooting and smooth functioning.

4.2 Baselines

Service Elements	Description
Contract duration	Initially for a period of three year from 01/01/2017 and extendable for a further period of 2 years subject to satisfactory performance.
Service Coverage	24x7 for Network link Monitoring, 24x7 for Network Management support.
Locations to be supported	Core Network at DC, DR, Head Offices, Mumbai Treasury, ATM switch connectivity. Branches across PAN India and overseas as per Annexure- L
Scope of services	BSNL/MTNL Link Commissioning Services. Coordination with other ISP (other than BSNL/MTNL) for implementation, troubleshooting. Network (WAN) Monitoring Services Network Management Services including support for Network Devices access India/ overseas.
Service Delivery Model	Onsite SLA

4.3 On site Manpower Assignment

i) One project manager at DR site (should be available during business hours 8 am – 8pm) for overall managing the project.

ii) Help Desk at DC, DR Site and 20 ZOs should be manned by dedicated manpower of following category.

Sl No.	Category	Kolkata Data Centre (DR)			Bangalore Data Centre		Resource at NAP (L1) (General Shift)
		Sr. Resource (L2)	Resource (L1) (General Shift)	Resource (L1) (24x7 Shift)	Resource (L1) (General Shift)	Resource (L1) (24x7 Shift)	
1	Core Network Management	2	2	1 (3)	1	1 (3)	0
2	Head Offices , Treasury Br. Management						
3	Euronet , ATM Management						
4	Branch Technical Support		1	1 (3)	1	1 (3)	
5	Core Network Monitoring						
6	Hardware Call Support		1	0	0	0	
7	Remote VPN Management						
8	SP2 Integration , Coordination , Management		2	0	0	0	
9	New Link Implementation						
10	Link Management		8	1 (3)	0	0	20
	Total Seat	2	14	3	2	2	20

iii) Besides above, manpower should be available to support branches network during any network problem in the site. Successful Bidder to deploy adequate manpower to ensure the desired uptime.

iv) The above manpower should be trained properly to identify the issue and rectify /resolved problem.

v) Ongoing training program for quarterly basis.

4.4 WAN Network Monitoring

All type of data circuit such as MPLS, Leased lines, ISDN, CDMA etc.

i) Monitoring of Primary BSNL MPLS, Leased Line and ISDN & CDMA links.

ii) Monitoring of Bank WAN, using NMS (HP Open View MNM) tool 24*7 basis.

iii) Monitoring of all the network devices at all locations using SNMP protocol for accessing device status / data.

iv) Provide monthly Site up time reports.

v) Link and device availability reports.

vi) Provide monitoring services as per the defined service window.

vii) As Bank is going for commissioning of 2nd service provider's MPLS link/VSAT as secondary link in branches, monitoring of ISDN & CDMA link will be effective till its existence.

4.5 Network Management service

i) Incident, Change and Configuration Management

ii) Restore failed service as soon as possible to minimize impact to the business.
iii) All changes in the existing/proposed environment are to be accomplished in coordination with the IT department with proper approvals from Bank's competent authority.
viii) Backup of device configurations on a weekly basis as per policy defined by Bank.
ix) Provide information & recommendations to Bank on the links and devices which are over utilized.
x) Periodic updates, audits for network device inventory.
xi) Keep track of the configuration changes for all the routers and other network equipment.
xii) Preparing the network diagram and updating it on a continual basis
xiii) Record and implement Service Requests as requested by Bank.

4.6 Core Networking

i) To manage Core Networking functions of Bank at onsite ensuring high availability of Networking Services to the business.
ii) Manage & support for Core Network devices (Routers, VPN Devices, switch, Firewall, IPS/IDS etc.)
iii) Ensure 24*7 network service availability
iv) Integration of network consisting of Leased Lines, MPLS, ISDN, VSAT, CDMA and other Technologies like VPN over Internet.
v) IP Schematic Management(IP Inventory, IP assignment & IP records)
vi) WAN device at Core & remote location Management and Reporting Monthly inventory of WAN equipment.
vii) Performance monitoring, tuning & reporting
viii) Monitoring WAN traffic, bandwidth utilization of all WAN links and generating reports.
ix) Evaluate system performance under normal and degraded condition.
x) Periodic fine tuning to ensure that network availability is at peak.
xi) Regular reporting on health of Network and Assets deployed.
xii) Logs and Backup management.
xiii) Co-ordination on / liaisoning with all vendors/OEM/ISP for support of network devices.
xiv) Maintain updated diagrams and document related to network.
xv) Network software management
xvi) Maintaining all asset details pertaining to network and reporting Quarterly basis.
xvii) Implementation & commissioning of new links including router configuration and policy implementation.

xviii) Management configuration , integration , troubleshooting of other SPs network at core level.

xix) Migration of IPv6 network at internet, if required.

xx) Network recovery should be automatically from primary to secondary and vice-versa.

4.7 Site Preparation

Selected bidder has to do site survey for commission of new link at new branches / existing branches concerned zonal office/Head Office

4.8 Supply, installation, configuration and maintenance of Equipment

i) Supply as per technical requirement & quality mentioned in Annexure-G , installation of networking equipment like router, switch, modem, proxy at various locations identified by the Bank. The equipment supplied must be seamlessly integrated with the existing equipment deployed in the bank.

ii) Generate & provide suitable IP address to new branches as per Bank's existing IP addressing scheme

iii) Detailed configuration of equipment to be deployed in the network.

iv) Configure necessary security feature.

v) Energisation of the MPLS link with backup link.

vi) On restoration of primary link, traffic should be dropped from secondary link automatically.

vii) Successful Bidder should conduct acceptance tests to ascertain the quality and completeness of the installation.

viii) The Successful Bidder should study & estimate the equipment capacity of the existing network equipment at the branches, , DC , DR & other offices.

ix) The Successful Bidder shall suggest for necessary upgradation of equipment for better performance with proper justification of change. Final decision to be taken by bank.

x) To implement IPsec encryption on new routers. The implementation includes, installation of the hardware, configuration of the router, creation of IP tunneling with VPN routers at DC & DR, testing, monitoring etc.

xi) The Bank reserves the right to shift the equipment from one location to another location depending upon its need. The vendor will arrange to shift, install and commission the equipment.

xii) Bidder will be required to stock adequate stand by equipment and spares in order to meet uptime commitment of this bid.

xiii) In case there is a cost incurred to the bank due the wrong configuration of network equipment at any location, the same will be borne by the Successful Bidder.

4.9 Maintenance of existing Networking Equipment

i) The successful Bidder shall also maintain the existing network equipment deployed in the bank WAN.

ii) Successful Bidder has to maintain the equipments supplied by him and the equipments under AMC with him and keep sufficient spare parts for maintaining the uptime of the equipment/site

4.10 Managing & Supporting Network at Field level

i) The Successful Bidder shall provide technical expertise at site to resolve any type of network problem e.g. Service Provider's exchange/POP problem, local lead problem, power problem etc. for smooth operation of the bank applications

ii) The support at site level should be available during any network problem in business hours (8AM to 8PM), on all working days for all sites other than, DC & DR where support will be provided on (24 * 7) on site basis.

iii) In the event of any problem at any location the support shall be made available immediately.

iv) To resolve the problem Successful Bidder shall liaison with all concerned and extend technical and other support.

v) The Successful Bidder shall be responsible for escalating the unresolved problems by field engineers to his higher authorities and get it rectified within stipulated time period and ensure uptime as defined in this bid document.(successful bidder is to provide the call escalation matrix to every location)

vi) The Successful Bidder shall arrange man power at various locations for day to day smooth functioning of network.

vii) Will be responsible for ensuring preventive maintenance and post failure repair of the equipment supplied & installed by him and the equipment under AMC with him

viii) Successful Bidder shall be responsible for maintaining the branch LAN up to branch switch level.

4.11 Managing & Supporting Network at Help Desk level

i) The Successful Bidder should provide technical expertise at Helpdesk to manage the network and to support field engineers to resolve the problem and for day to day smooth operation.

ii) The support at help desk level should be available during business hours (8.00AM to 8.00PM)for all 20 ZOs.
iii) The support at DC & DR help desk should be available for **on 24X7 basis.**
iv) The help desks should be manned by dedicated manpower as per the details given at clause 4.3.
v) The successful bidder shall have to ensure the readiness of the ISDN/CDMA backup link at any point of time for any back up link.
vi) The successful bidder shall also have to prevent unnecessary calls/ expenditure in respect of backup links,
vii) The Successful bidder is responsible to resolve the problem within the stipulated time schedule referred by any of the following:
    i. The network trouble tickets generated in the EMS tool
    ii. Telephonic information
    iii. E-mail information etc.

4.12 Uptime maintenance

i) The overall uptime should be 99.9% Core network (DC, DR, HOs, Treasury, ATM Switch network)
ii) The overall network uptime should be 99.5 % during business hours (8 am to 8 pm) for all days.
iii) The overall network uptime should be 99% during non-business hours (8 pm to next day 8 am).
iv) To prevent site down due to failure of dual link or equipment, Successful Bidder shall have to maintain the site uptime as specified in the uptime clause.
v) No down time (site) shall be permitted in case of DC. DR Site will act as DC at the time of DC disaster as per DRP (Disaster Recovery Plan).
vi) No down time (site) shall be permitted in case of DR site.

4.13 Integration of new application/network on existing Network

i) Based on the requirement Successful Bidder has to integrate any new network to the Banks existing network smoothly, which may be obtained from existing bandwidth provider or any new bandwidth provider as per the decision of the bank. Successful Bidders may advice bank in selection of media/type of link.

ii) Bank may implement new applications over the network. The successful Bidder shall implement such application/network for which it has to prepare plan, bandwidth sizing & identify network equipment specification for the integration.

iii) Successful Bidder shall install & configure network equipment for integration of new application, additional network etc., shall support for smooth operation of the entire network, conduct user training at the location specified by the bank. and provide consultation,

management and monitoring for other network related problems of any applications.

4.14 Access list Management

i) Manage the access lists on all the network equipments.
ii) Maintain a record of branches with deviation in standard access list along with the reasons.
iii) Any change/removal in the access lists to be done only with approval from the network department
iv) Report on a monthly basis the changes done in ACLs branch-wise
v) Port management for managed switches.

4.15 Configuration Management

i) All network devices configuration is done by selected bidder including a hardening of device as per Bank requirement. If ISDN get fired because of wrong or unwanted configuration, the bill generated out of wrong configuration shall borne by bidder.
ii) During any major incident or Critical activity or redesign level resource should be available at site. Bank will not pay any extra charges for the same.

4.16 Inventory Management

i) Periodic updates, monthly audits for network device inventory.
ii) Inventory database must be maintained by NOC operations unit for all network devices.
iii) Quarterly submission of all network devices inventory (Branches and hub locations) report, on site visit and signed by the branch location head.
iv) Upgrade the IOS ,if needed, on the routers for effective functioning
v) Making the network diagram and updating it on a continual basis
vi) Maintain IP wise user detail list for all branches / centre and monitor

4.17 Vendor Management

i) Coordinating with ISP for quick breakfix resolution of WAN issues.
ii) Coordination with the vendors/OEM who have supplied network products and devices.
iii) Managing the vendor's SLA and reporting the same on a monthly basis.

4.18 Helpdesk

i) Daily reports & monthly report.
ii) Provide consultation services for integration of new technologies adapted by Bank in the field of network and assist in rollout of the same

iii) Suggest / recommend changes in the network and/or device configurations for securing the same against any probable attacks, increasing data transfer security, upgradation of network etc.
iv) Compliance of audit queries as per recommendations.
v) Infrastructure design of any kind, Network Audits, base lining and consulting services of any kind
vi) Assist the bank to carry out any maintenance activities on the network devices and also during DR drills.
vii) Assist the bank to carry out any maintenance activities also during DR drills.
viii) ISDN utilization report with detail event and clarification. Extra usage will be deducted from vendor in case of SLA mismatch for that link.
ix) Confirmation from branches regarding ISDN bills payments and inventory.
x) Any other task relevant to, but not mentioned above.
xi) Submission of link uptime Reports daily basis.
xii) Onsite engineers should attended call from braches for network related support.

4.19 Bidder Deliverables and Liability

i) The deputed personnel should be prepared to work for extended working.
ii) Required manpower should be deputed at Bank DC & DR site within 1 weeks from the date of Purchase Order.
iii) Details like Name, Address contact should be provided. Bank may take an interview of onsite engineers before deployment.
iv) The onsite team shall maintain attendance register and the same should be sent monthly to Bank for SLA calculations, failing which appropriate penalty condition as defined below shall be invoked.
v) The onsite team shall not be changed without adequate notice (minimum 15 days) to Bank. Any resigned resource of onsite team should not be relieved before giving suitable replacement. Any breach of this clause will attract penalty
vi) The vendor will also provide suitable onsite technical staff to supplement the efforts of the onsite support resources during emergencies / contingencies which might impact the systems, solutions and services covered under this scope.
vii) The Vendor must ensure one month's notice with proper handover for any change of manpower pertaining to project manager profile.
viii) Dedicated Shared resources to be deployed at all 20 ZOs Locations. Details of shared resources will be submitted to Bank within one week from the date of award of contract.
ix) In case of instruction by Bank, member should be change.

4.20 Covenant of the Bidder

i) In the implementation of the contract, the bidder and its employees shall at all the times comply with & abide by the security policy of the bank in so far as the same may be applicable to or in respect of the works and the provisions of the contract.

ii) Confidentiality of the network setup, configurations and all related details including the addressing scheme etc shall not be disclosed by the bidder to any third parties or persons (except to bidder's own employees and that too only to those employees or representatives who need to know the same).

iii) Bidder will follow and comply with the procedures and policies, applicable to the scope of work mentioned above lay down by the Bank vide IS Security Policy from time to time and also extend full cooperation to the auditors designated by Bank.

Bidder will assist and cooperate with the Bank auditors in a way as they are expected to assist and cooperate with their audit.

4.21 Facilities Management for Network, Security Components and WAN/LAN links.

यूको बैंक UCO BANK

FM services for the Bank's Network and security components & network links is mentioned below:

Components	Locations
Security Equipments ▪ Firewalls ▪ NIPS/IDS ▪ Authentication Server – ACS ▪ HIPS ▪ AAA Server ▪ LAN & LMS ▪ Proxy	BDC / KDC/Mumbai Treasury
Network Equipments ▪ Routers ▪ Switches	BDC/KDC/ZOs/Branches/HO /offices
WAN Links ▪ MPLS ▪ CDMA ▪ ISDN ▪ VSAT ▪ VPN Over Internet	BDC/KDC/ZOs/Branches/HO/offices

Refer to "Annexure –M List of Existing Network & Security Components" and for link details refer to "Annexure L - Link Details" for detailed list of components

mentioned above.

4.22 Training & support for product evaluation

i) The advanced level training programme shall be held in bank's different HO/Zonal training centre located across the country for the network user at, DC, DRs and ZO other offices. The training shall be related to LAN, WAN, networking equipment etc.
ii) For user level training programme, Successful Bidder shall have to provide faculty at different training programme organised by bank at bank's different Zonal training centre located across the country.
iii) The successful Bidder shall provide support on evaluation of new trends/technology in the networking, network security, and network performance enhancement for betterment of banks' network.
iv) The Successful Bidder shall suggest optimal utilisation and expansion of network.
v) The Successful Bidder shall coordinate with the banks' security consultant / security integrator for ensuring network security.
vi) The Successful Bidder shall coordinate with the banks' IT consultant / advisors for evaluating any network related issues.

4.23 Documentation & Reports

i) The successful Bidder shall provide documentation related to every activity (as per the scope of work) like network design/expansion, equipment configuration, layout plan and any changes made to, or deviations from design, configuration, base line configuration etc.
ii) The successful Bidder shall provide following reports from time to time (as per the timeline and format decided by the bank)
    a. Response time reports
    b. Down time reports on daily basis.
    c. ISDN Usage report
    d. On-line monitors
    e. Help desk reports
    f. Manpower deployment report
    g. Spare Equipment Inspection report etc.
    h. Status of commissioning of links on monthly basis.
    i. Call Escalation Matrix
    j. Bandwidth utilization report on link basis.
    k. Any other reports, if required
iii) Shall prepare & provide Standard site preparation guidelines.
iv) Overall project documentation.
v) Take regular backup of configuration after a specific time interval of all the bank's branch network
vi) Prepare white paper on new technology / product relevant to the network.
vii) Every quarterly basis bidder should provide all network devices configuration details in CDs/DVDs.

4.24 On disaster at DC, all branches should be atomically connected to DR.

4.25 On restoration of primary link, traffic should be dropped from secondary link automatically.

4.26 On restoration of DC, branch/ office network traffic should be automatically.

4.27 The main media availability should be MPLS. Only in case of major problem in main link, ISDN / CDMA/VSAT/MPLS by alternate service provider as backup should be used.

4.28 Successfully bidder has to ensure speedy recovery of MPLS and bring back the availability of network on main media to have minimum ISDN/CDMA unitization.

4.29 The successful bidder shall enter into a contract with the bank. The contract shall contain the terms & conditions, scope of work, SLAs to be maintained etc.

4.30 On-site Project Manager has to prepare maintains a daily incident report as per SLA.

4.31 Apart from above, bidder team should be proactive in terms of early diagnosis of problems, detection of any abnormalities in the network and take corrective/preventive measure promptly.

4.32 Whenever there is installation / configuration of the link is being carried out, the bidder has to configure all the network equipments including Backup links.

4.33 The bidder to provide onsite support for branch/corporate locations for any network issues and as & when required.

4.34 Whenever there are network issues at any locations, the bidder should provide onsite support engineers to resolve the same within signed SLA. No separate charges will be borne by Bank.

4.35 Bidder shall provide backup resource in case any of the project member avails leave, however bidder service delivery team will be entirely responsible for team deployment, SLA monitoring, task delegation, workload distribution and team size.

4.36 Absence of any resources must be companied with equal skill resources.

4.37 Every month review meeting with project manager and ISP team.

4.38 Coordinate with the telecom service provider and assist Bank to procure, commission, upgrade / shift / decommission all types of data circuit lines so that they can build network in a timely manner.

4.39 Liaison with the respective service providers for resolution of link failures.

4.40 Coordinate with the respective equipment vendor / service provider for restoration of the failed device / service.

4.41 Maintain updated diagrams and documents related to network and also maintain all relevant information of the links like data circuit numbers, commercial reference numbers and other technical details.

4.42 Maintain billing related information branch wise along with the payment status.

4.43 Vendor will be responsible for putting up and settling our claim for refund if any to the Service Provider for bills of such links where SLA has not been met with.

4.44 Maintain comprehensive branch wise information relevant to the network equipments i.e routers, modems, NT1, etc with details like whether owned by Bank, the AMC/warranty vendor, DOC, EOL,EOS etc.

4.45 Maintain monthly report on the total links of Bank with details like bandwidth, branch id , equipment, IP details etc.

4.46 New link Commissioning and new link delivery period should be 4 weeks from the date intimation/mail communication.

4.47 Bidder will conduct MPLS feasibility for only VSAT running branches every quarter and submit the feasibility report.

4.48 During branch inauguration /renovation /relocation engineer should present onsite for that day for all kind of network support.

4.49 Upgradation of the existing links will be commissioned at earliest as per requirement.

4.50 In case of link surrender/terminations the surrender/termination request to respective vendor, surrender/termination order and refund if any should be completed within 15 days.

4.51 Monitor WAN traffic, bandwidth utilization and generate reports.

4.52 Performance monitoring, tuning and reporting.

4.53 Evaluate system performance under normal and degraded condition.

4.54 Maintain all asset details pertaining to network and report on quarterly basis.

4.55 Address issues of latency and other connectivity issues of branches.

4.56 Manage – passive network components in the datacentre/branches like modems, FCD converters, and other networking devices in the core network including configuration.

4.57 IP scheme management including IPv6.

4.58 WAN device management and reporting the monthly inventory of WAN equipment

4.59 Periodic fine-tuning to ensure optimal network availability.

4.60 Regular checking for proper functioning of network and assets deployed.

4.61 Scheduled ISDN testing must be a routine checkup after every 3 days.

4.62 Incident, Change and Configuration Management ,IOS Upgradation, change request management, configuration change management network restructuring is part of managed services.

4.63 Maintain and manage configuration of all routers.

4.64 Management of network equipment on site and providing L1/L2/L3 support for fault diagnostic for both software and hardware.

4.65 Troubleshoot, debug and restore failed services as soon as possible to minimize impact to the business.

4.66 Maintain logs and record of the major incidents, changes in configurations of the routers and equipment with reasons.

4.67 The bidder has to ensure that any equipment to be supplied as part of this RFP should not have either reached end of sales for at least 3 years post-date of acceptance of such equipment by the Bank. Further any equipment supplied by the bidder, should not have reached end of support/life for at least 2 years from the date of contract expiry. In the event if any equipment supplied by the bidder, reaches either end of sales / life support as stipulated in this clause, within the period of contract, the bidder has to immediately replace the equipment at no additional cost to the Bank.

4.68 The bidder is required to replace the end of life and end of support components six months before the end of life date. The bidder needs to supply, install and commission and maintain network equipment for the period of contract. The specifications of the network equipment are given in "Annexure-G".

यूको बैंक UCO BANK

4.69 Bidder should supply, install Proxy solution, Router, Switch, LL Modem, Firewall, IPS with support service for the period of 3 years. Details technical requirement as mention Annexure G.

4.70 The proxy solution must Appliance based and support minimum of 2000 concurrent users from the day one and scalable up to 4000 concurrent. Centralized proxy solution should be installed at Kolkata DC. Initial Bank will procure 500 concurrent licenses for proxy server. In future bank will procure additional license in 500 blocks.

4.71 Bidder should provide 3 years warranty/AMC/ATS support all network (Hardware and Network) equipment mentioned in Annexure J. Bidder should replace end of support product as mentioned in Annexure J.

4.72 Security being prime concern, Solution should not breach the security of any other installations of Bank in any way.

PART-V

5.1 Order details

The purchase order will be placed by the Bank time to time from it's Head Office, DIT in the name of selected bidder as per requirement. The payment will be made by Head Office, DIT and the Performance Bank Guarantee for each order will be required to be submitted in the same office.

5.2 Performance Bank Guarantee

The Selected bidder, within 30 days from the date of each purchase order will have to furnish a Performance Bank Guarantee, format as Annexure A, issued by any scheduled commercial bank equal to 10% of the order value valid for 39 months from the date of purchase order. Upon furnishing the Performance Bank Guarantee of first order, the EMD of the selected bidder shall be returned. If extended for 2 years, accordingly PBG shall be extended or resubmit by the bidder.

The Performance Bank Guarantee shall act as a security deposit and either in case the selected bidder is unable to start the project within the stipulated time or start of the project is delayed inordinately beyond the acceptable levels, the Bank reserves the right to forfeit the same.

Further, the Bank reserves the right to invoke the Performance Bank Guarantee in case the Selected bidder is not able to fulfill any or all conditions specified in the document or is unable to complete the project within the stipulated time. This is independent of the LD on Delivery and installation.

5.3 Installation and commissioning

5.3.1 Deliveries of the new networks equipment/device/solution, installation and operationalization of complete solution at all locations should be made within 4 weeks from the date of purchase order.

5.3.2 Bidder has to commission the links at DC and DR within 4 weeks and all other links within 6 weeks.

5.3.3 If the site is not ready due to reasons attributed to the Bank, no penalty will be levied by the Bank.

5.3.4 Shifting/upgradation of link will be completed within 4 weeks from date of PO for shifting the link.

5.4 Payment Terms

Bank will make the payment subject to signing of the contract as follows:

5.4.1 The initial period will be for 3 year. However same will be extended for 2 years based on performance basis.

5.4.2 90**%** of the value of new network equipment/devices/solutions/link implementation/shifting/upgradation of along with Taxes, will be paid after delivery and completion of successful installation & operational, on submission of proof of delivery and the acceptance certificate duly signed by Bank's authorized official & satisfactory service report from the Bank where the systems have been installed after realizing penalty charges for late delivery & installation, if any. The balance **10%** of order value will be paid after 3 months successful running.

5.4.3 100**%** of the value of new link implementation/shifting/upgradation of along with Taxes, will be paid after completion of successful commissioning & operational, on submission of acceptance certificate duly signed by Bank's authorized official after realizing penalty charges for late delivery & installation, if any.

5.4.4 Payment towards Facility Management & AMC will be made quarterly in arrears after issuing of necessary invoice and submission of monthly reports including SLA and after deduction of penalties if any. In case of termination of services, the payment will be made on pro rata basis for the duration for which the services were provided.

5.4.5 Bidder should raise invoices after deducting the applicable penalties i.e. SLA, extended, etc.

5.5 Price

The cost of network link must include rental charges of network equipment's e.g modem, repeater, etc. required to be terminated the link at CPE Ethernet interface. The Price Bid also must include all applicable taxes such as Sales/Service/VAT / Waybill etc. The Octroi /Entry Tax will be paid extra, wherever applicable on submission of actual Tax receipt.

The Selected bidder is required to guarantee that exchange rate fluctuations, changes in import duty and other taxes will not affect the Rupee value of the commercial bid, over the validity period of the bid. The prospective service provider shall establish the Network and should be

capable of maintaining it for a minimum period of 3 years initially and then subsequent extension for 2 years based on performance basis.

The Bank further reserves the right to reject any or all offers based on its own evaluation of the offers received, or on the basis of stability, capabilities, track records, reputation among users and other similar features of a Selected bidder.

Prices quoted by the selected bidder shall be in Indian Rupees, firm and not subject to any price escalation, if the order is placed within the validity period. Further, subsequent to the orders being placed/agreement executed, the selected bidder shall pass on to the Bank all fiscal benefits arising out of reductions in Government levies viz. Sales tax, excise duty, custom duty, etc.

5.6 SLA

The bidder shall sign contract, SLA with Bank incorporating following parameters:

i) The Scope of services / SLA mentioned in this document will be reviewed quarterly during the contract period and may be amended.

ii) Working days: Six days a week (Monday to Saturday) for branches and Seven days a week for core network.

iii) Uptime: on monthly basis for each location as mentioned below:

Sl.	Link category	Uptime (24X7 basis)
1	DC DR site	99.9%
2	All Other site except Rural Branch	99.5%
3	Rural Branch	98%

iv) The percentage SLA uptime shall be calculated for each site on monthly basis excluding back up link.

The above SLA is proposed based on certain factors. The following are the dependencies and assumptions:

- The uptime will be measured and reported for the entire network and system devices on a monthly basis for each site.

- Calculations for uptime shall not include "planned downtime",
- Failures due to environmental or power nonavailability or outage on customer behalf will not be included in SLA calculations,
- Force Majeure clauses such as Fire, Earthquake, Floods, Govt. problems, Riots, civil disturbance and other acts of God shall not be included for SLA calculations. However, on clearance of force Majure solution or available of remedial solution of force majure situation above mentioned SLA will be applicable.
- SLA will be calculated monthly for the service hours (Six days a week (Monday to Saturday) for non-ATM branches and for 24 hours Seven days a week for ATM branches/off site ATM / e-lobby sites.

5.7 Payment against delivery of SLAs :

Bank will pay charges on per site basis depending upon the achievement of uptime. However bank issues will be exempted from calculating the uptime.

Uptime	**% of payment**	**Uptime**	**% of payment**	**Uptime**	**% of payment**
DC, DR, Treasury, ATM network		All Other site except Rural Branch		Rural Branch	
99.9% or more	**100%**	99.5% or more	**100%**	98% or more	**100%**
>99.7% to <99.9%	**90%**	>98% to <=99.49	**90%**	>96% to <=97.99	**90%**
>99.5% to <99.7%	**80%**	>97% to <=97.99	**80%**	>94% to <=95.99	**80%**
>99.3% to <=99.5%	**70%**	>96% to <=96.99	**70%**	>92% to <=93.99	**70%**
>99.0% to <=99.3%	**60%**	>95% to <=95.99	**60%**	>90% to <=91.99	**60%**
Less than 99%	**Nil**	Less than 95%	**Nil**	Less than 90%	**Nil**

Calculation of uptime will be monthly basis as per following criteria.

$$\% \text{ of uptime} = \frac{\text{[Total Business hours in month - Total downtime during business hours in month] x 100}}{\text{[Total Business hours in month]}}$$

Bank may monitor the links by its own tool for uptime along with Service provider. In case of difference in uptime, Bank may consider the payment based on report generated by Bank's tool, if bidder is unable to justify the difference.

Performance Measurement (SLA uptime calculation)

Working hours calculated as per the service window time for:

A. Core & Backbone including ATM Switch & Mumbai Treasury locations will be – 24 Hrs
B. Branch working days - 08:00 am to 08:00 pm (12 Hrs)

Total business hours for one month Case A = 24*60*30(31) = 43200 / 44640 minutes

Total business hours for one month Case B = 12*60*30(31) = 21600 / 22320 minutes

E.g. If a branch down time in a particular month is 13 Hrs and Branch working is 30 days in a month, the Service Window (24Hrs) having schedule down time of 5 Hrs, then the percentage of down time calculated as

= {(43200 - 5*60) - (13*60)} * 100 / 43200
= {(42900)-(780)}*100/43200
= 97.5 %

Accordingly Bank will pay 80 % on Network management service Charges of said branch.

5.8 Liquidated Damage

Any delay in delivery/installation/commissioning/shifting/upgradation of the link/device/equipment/solution beyond the stipulated time period as per clause no. 5.3, Bank will charge penalty at 1 % of the order value for that link/device/equipment/implementation cost per week or part thereof, subject to a maximum of 10%. The bank may at its discretion also waive or reduce the penalty if the reasons for delay are considered to be justified.

After elapsing of stipulated time period including 10 Weeks Liquidated damages period, if selected bidder fails to implement any or all MPLSs link in branches, the order for such links will be deemed cancelled after

imposing necessary penalty amount as per LD clause 5.8 and bank will place the order to any other selected bidder.

If Bidder fails to commission the link as per feasibility report (this includes change of media) 10% of the link cost will be deducted from payment of other link or from Performance Bank Guarantee and bank will place the order to any other selected bidder.

5.9 Force Majeure

Force Majeure is herein defined as any cause, which is beyond the control of the selected bidder or the Bank as the case may be which they could not foresee or with a reasonable amount of diligence could not have foreseen and which substantially affect the performance, such as:

- Natural phenomenon, including but not limited to floods, droughts, earthquakes, epidemics,
- Situations, including but not limited to war, declared or undeclared, priorities, quarantines, embargoes,
- Terrorist attacks, public unrest in work area,

Provided either party shall within ten (10) days from the occurrence of such a cause notify the other in writing of such causes. The Selected bidder or the Bank shall not be liable for delay in performing his / her obligations resulting from any Force Majeure cause as referred to and / or defined above.

5.10 Completeness of the Project

The project will be deemed as incomplete if the desired objectives of the project as mentioned in Section "Scope of Work" of this document are not achieved.

5.11 Acceptance Testing

The Bank will carry out the acceptance tests within 15 days of link handover for testing of successfully integration with Bank network as per scope of work in Part IV. The Vendor shall assist the Bank in all acceptance tests to be carried out by the Bank. The provisioned items will be deemed accepted only on successful acceptance of those products and the vendor would need to provision insurance of those items till successful acceptance. The Bank at it's' discretion may modify, add or amend the acceptance tests which then will have to be included by the vendor. The Vendor shall arrange for the tests at the relevant sites in the presence of the officials of the Bank. The Vendor should ensure that the tests will involve trouble-free operation of the complete system apart from physical

verification and testing and that there shall not be any additional charges payable by the Bank for carrying out this acceptance test.

In case of any discrepancy, the Bank reserve the right to terminate the entire agreement in case the bidder does not rectify the issue and the bidder shall take back bidder equipment (if any) at bidder's costs and risks. The Bank have the right to reject the 'Vendor Supplied Link' and to seek free replacement of the link till the completion of acceptance test and obtaining final acceptance certificate from the Bank.

5.12 Order Cancellation

The Bank reserve its right to cancel the order in the event of one or more of the following situations, that are not occasioned due to reasons solely and directly attributable to the Bank alone:

- Delay in commissioning / implementation / testing beyond the specified period. After elapsing of stipulated time period including 10 Weeks Liquidated damages period, if selected bidder fails to implement any or all MPLSs link in branches, the order for such links will be deemed cancelled after imposing necessary penalty amount as per LD clause 5.8 and bank will place the order to any other selected bidder.
- Serious discrepancy in the quality of service expected during the implementation, rollout and subsequent maintenance process.
- In case of cancellation of order, any payments made by the Bank to the Vendor would necessarily have to be returned to the Bank, further the Vendor would also be required to compensate the Bank for any direct loss suffered by the Bank due to the cancellation of the contract/purchase order and any additional expenditure to be incurred by the Bank to appoint any other Vendor. This is after repaying the original amount paid.
- Vendor should be liable under this section if the contract/ purchase order has been cancelled in case sum total of penalties and deliveries equal to exceed 10% of the TCO.
- Please also refer 5.19 herein below.

5.13 Indemnity

Vendor shall indemnify, protect and save the Bank and hold the Bank harmless from and against all claims, losses, costs, damages, expenses, action suits and other proceedings, (including reasonable attorney fees), relating to or resulting directly or indirectly from (i) an act or omission of the Vendor, its employees, its agents, or employees of the consortium in the

performance of the services provided by this contract, (ii) breach of any of the terms of this RFP or breach of any representation or warranty by the Vendor, (iii) use of the deliverables and or services provided by the Vendor, (iv) infringement of any patent, trademarks, copyrights etc. or such other statutory infringements in respect of all components provided to fulfil the scope of this project. Vendor shall further indemnify the Bank against any loss or damage to the Bank premises or property, loss of life, etc., due to the acts of the Vendor's employees or representatives. The Vendor shall further indemnify the Bank against any loss or damage arising out of claims of infringement of third-party copyright, patents, or other intellectual property, and third-party claims on the Bank for malfunctioning of the equipment or software or deliverables at all points of time, provided however, (i) the Bank notify the vendor in writing immediately on becoming aware of such claim, (ii) the Vendor has sole control of defence and all related settlement negotiations, (iii) the Bank provides the Vendor with the assistance, information and authority reasonably necessary to perform the above, and (iv) the Bank does not make any statement or comments or representations about the claim without prior written consent of the Vendor, except under due process of law or order of the court. It is clarified that the vendor shall in no event enter into a settlement, compromise or make any statement (including failure to take appropriate steps) that may be detrimental to the Bank (and/or its customers, users and service providers) rights, interest and reputation.
Vendor shall be responsible for any loss of life, etc, due to acts of Vendor's representatives, and not just arising out of gross negligence or misconduct, etc, as such liabilities pose significant risk.

Vendor should take full responsibility for its and its employee's actions.

The vendors should indemnify the Bank (including its employees, directors or representatives) from and against claims, losses, and liabilities arising from:

- Non-compliance of the vendor with Laws / Governmental Requirements
- IP infringement
- Negligence and misconduct of the Vendor, its employees, and agents
- Breach of any terms of RFP, Representation or Warranty
- Act or omission in performance of service.

Indemnity would be limited to court; tribunal or arbitrator awarded damages and shall exclude indirect, consequential and incidental damages. However indemnity would cover damages, loss or liabilities suffered by the Bank arising out of claims made by its customers and/or regulatory authorities.

The vendor shall not indemnify the Bank for

(i) Any loss of profits, revenue, contracts, or anticipated savings or

(ii) Any consequential or indirect loss or damage however caused, provided that the claims against customers, users and service providers of the Bank would be considered as a "direct" claim.

5.14 Publicity

Any publicity by the Selected bidder in which the name of the Bank is to be used should be done only with the explicit written permission of the Bank.

5.15 Privacy & Security Safeguards

The Selected bidder shall not publish or disclose in any manner, without the Bank's prior written consent, the details of any security safeguards designed, developed, or implemented by the Selected bidder under this contract or existing at any Bank location. The Selected bidder shall develop procedures and implementation plans to ensure that IT resources leaving the control of the assigned user (such as being reassigned, removed for repair, replaced, or upgraded) are cleared of all Bank data and sensitive application software. The Selected bidder shall also ensure that all subcontractors who are involved in providing such security safeguards or part of it shall not publish or disclose in any manner, without the Bank's prior written consent, the details of any security safeguards designed, developed, or implemented by the Selected bidder under this contract or existing at any Bank location.

5.16 Technological Advancements

The Selected bidder shall take reasonable and suitable action, taking into account economic circumstances, at mutually agreed increase / decrease in charges, and the Service Levels, to provide the Services to the Bank at a technological level that will enable the Bank to take advantage of technological advancement in the industry from time to time.

5.17 Guarantees

Selected bidder should guarantee that all the material as deemed suitable for the delivery and management of the Installation, Commission and Maintenance of This MPLS link scope as defined under this document, are licensed and legal. All hardware and software must be supplied with their original and complete printed documentation.

5.18 Resolution of Disputes

The Bank and the supplier Vendor shall make every effort to resolve amicably, by direct informal negotiation between the respective project directors of the Bank and the Vendor, any disagreement or dispute arising between them under or in connection with the contract.

If the Bank project director and Vendor project director are unable to resolve the dispute after thirty days from the commencement of such informal negotiations, they shall immediately refer the dispute to the senior authorised personnel designated by the Vendor and Bank respectively.

If after thirty days from the commencement of such negotiations between the senior authorised personnel designated by the Vendor and Bank, the Bank and the Vendor have been unable to resolve amicably a contract dispute, either party may require that the dispute be referred for resolution through formal arbitration.

All questions, disputes or differences arising under and out of, or in connection with the contract or carrying out of the work whether during the progress of the work or after the completion and whether before or after the determination, abandonment or breach of the contract shall be referred to arbitration by a sole Arbitrator: acceptable to both parties OR the number of arbitrators shall be three, with each side to the dispute being entitled to appoint one arbitrator. The two arbitrators appointed by the parties shall appoint a third arbitrator who shall act as the chairman of the proceedings. The award of the Arbitrator shall be final and binding on the parties. The Arbitration and Conciliation Act 1996 or any statutory modification thereof shall apply to the arbitration proceedings and the venue of the arbitration shall be Kolkata.

If a notice has to be sent to either of the parties following the signing of the contract, it has to be in writing and shall be first transmitted by facsimile transmission by postage prepaid registered post with acknowledgement due or by a reputed courier service, in the manner as elected by the Party giving such notice. All notices shall be deemed to have been validly given on (i) the business date immediately after the date of transmission with confirmed answer back, if transmitted by facsimile transmission, or (ii) the expiry of five days after posting if sent by

registered post with A.D., or (iii) the business date of receipt, if sent by courier.

This RFP document shall be governed and construed in accordance with the laws of India. The courts of Kolkata alone and no other courts shall be entitled to entertain and try any dispute or matter relating to or arising out of this RFP document. Notwithstanding the above, the Bank shall have the right to initiate appropriate proceedings before any court of appropriate jurisdiction, should it find it expedient to do so.

5.19 Exit Option and Contract Re-Negotiation

The Bank reserves the right to cancel the contract in the event of happening one or more of the following Conditions:

- Failure of the Selected bidder to accept the contract / purchase order and furnish the Performance Guarantee within 30 days of receipt of purchase contract;
- Delay in offering link;
- Delay in commissioning link beyond the specified period;
- Delay in completing commissioning / implementation and acceptance tests / checks beyond the specified periods;
- Serious discrepancy in link noticed during the testig;
- Serious discrepancy in functionality to be provided or the performance levels agreed upon, which have an impact on the functioning of the Bank.
- Serious discrepancy in completion of project.
- Serious discrepancy in maintenance of project.

In addition to the cancellation of purchase contract, Bank reserves the right to appropriate the damages through encashment of Bid Security / Performance Guarantee given by the Selected Bidder.

The Bank will reserve a right to re-negotiate the price and terms of the entire contract with the Selected Bidder at more favourable terms in case such terms are offered in the industry at that time for projects of similar and comparable size, scope and quality.

The Bank shall have the option of purchasing the equipment from third-party suppliers, in case such equipment is available at a lower price and the Selected Bidder's offer does not match such lower price. Notwithstanding the foregoing, the Selected Bidder shall continue to have the same obligations as contained in this scope document in relation to such equipment procured from third-party suppliers.

As aforesaid the Bank would procure the equipment from the third party only in the event that the equipment was available at more favourable terms in the industry, and secondly,

The Equipment procured here from third parties is functionally similar, so that the Selected Bidder can maintain such equipment.

The modalities under this right to re-negotiate /re-procure shall be finalized at the time of contract finalization.

Notwithstanding the existence of a dispute, and/or the commencement of arbitration proceedings, the Selected Bidder will be expected to continue the services. The Bank shall have the sole and absolute discretion to decide whether proper reverse transition mechanism over a period of 6 to 12 months, has been complied with. In the event of the conflict not being resolved, the conflict will be resolved through Arbitration.
The Bank and the Selected Bidder shall together prepare the Reverse Transition Plan. However, the Bank shall have the sole decision to ascertain whether such Plan has been complied with.

यूको बैंक UCO BANK

Reverse Transition mechanism would typically include service and tasks that are required to be performed / rendered by the Selected Bidder to the Bank or its designee to ensure smooth handover and transitioning of Bank's deliverables, maintenance and facility management.

5.20 Corrupt and Fraudulent Practices

As per Central Vigilance Commission (CVC) directives, it is required that Bidders / Suppliers / Contractors observe the highest standard of ethics during the procurement and execution of such contracts in pursuance of this policy:
"Corrupt Practice" means the offering, giving, receiving or soliciting of anything of values to influence the action of an official in the procurement process or in contract execution AND
"Fraudulent Practice" means a misrepresentation of facts in order to influence a procurement process or the execution of contract to the detriment of the Bank and includes collusive practice among bidders (prior to or after bid submission) designed to establish bid prices at artificial non-competitive levels and to deprive he Bank of the benefits of free and open competition.

The Bank reserves the right to reject a proposal for award if it determines that the bidder recommended for award has engaged in corrupt or fraudulent practices in competing for the contract in question.
The Bank reserves the right to declare a firm ineligible, either indefinitely or for a stated period of time, to be awarded a contract if at any time it determines that the firm has engaged in corrupt or fraudulent practices in competing for or in executing the contract.

5.21 Termination

The Bank shall be entitled to terminate the agreement with the Selected bidder at any time by giving ninety (90) days prior written notice to the Selected bidder.

The Bank shall be entitled to terminate the agreement at any time by giving notice if:

- The Selected bidder breaches its obligations under the scope document or the subsequent agreement and if the breach is not cured within 30 days from the date of notice.
- The Selected bidder (i) has a winding up order made against it; or (ii) has a receiver appointed over all or substantial assets; or (iii) is or becomes unable to pay its debts as they become due; or (iv) enters into any arrangement or composition with or for the benefit of its creditors; or (v) passes a resolution for its voluntary winding up or dissolution or if it is dissolved. The Selected bidder shall have right to terminate only in the event of winding up of the Bank.

In the event of termination of the Contract due to any cause whatsoever, [whether consequent to the stipulated term of the Contract or otherwise], UCO BANK shall be entitled to impose any such obligations and conditions and issue any clarifications as may be necessary to ensure an efficient transition and effective business continuity of the Service(s) which the selected Vendor shall be obliged to comply with and take all available steps to minimize loss resulting from that termination/breach, and further allow the next successor Vendor to take over the obligations of the erstwhile Vendor in relation to the execution/continued execution of the scope of the Contract.

Bank shall have the right to initiate appropriate proceedings before any court of appropriate jurisdiction, should it find it expedient to do so.

5.22 Effect of termination

The Selected bidder agrees that it shall not be relieved of its obligations under the reverse transition mechanism notwithstanding the termination of the assignment.

Reverse Transition mechanism would typically include service and tasks that are required to be performed / rendered by the Selected bidder to the Bank or its designee to ensure smooth handover and transitioning of Bank's deliverables and maintenance.

Same terms (including payment terms) which were applicable during the term of the contract/ purchase order should be applicable for reverse transition services.

The Selected bidder agrees that after completion of the Term or upon earlier termination of the assignment the Selected bidder shall, if required by the Bank, continue to provide maintenance services to the Bank at no less favorable terms than those contained in this scope document. In case the bank wants to continue with the Selected bidder's services after the completion of this contract/ purchase order then the Selected bidder shall offer the same or better terms to the bank. Unless mutually agreed, the rates shall remain firm.

यूको बैंक UCO BANK

The Bank shall make such prorated payment for services rendered by the Selected bidder and accepted by the Bank at the sole discretion of the Bank in the event of clause of termination, provided that the Selected bidder is in compliance with its obligations till such date. However, no payment for "costs incurred, or irrevocably committed to, up to the effective date of such termination" will be applicable to Selected Bidder. There shall be no termination compensation payable to the Selected bidder.

Termination shall not absolve the liability of the Bank to make payments of undisputed amounts to the Selected bidder for services rendered till the effective date of termination. Termination shall be without prejudice to any other rights or remedies a party may be entitled to hereunder or at law and shall not affect any accrued rights or liabilities or either party nor the coming into force or continuation in force of any provision Selected Bidder hereof which is expressly intended to come into force or continue in force on or after such termination.

5.23 Arbitration

All dispute or differences whatsoever arising between the Selected bidder and the Bank out of or in relation to the construction, meaning and

operation, with the Selected bidder, or breach thereof shall be settled amicably. If, however, the parties are not able to resolve any dispute or difference aforementioned amicably, the same shall be settled by arbitration in accordance with the Rules of Arbitration of the Indian Council of Arbitration and the award made in pursuance thereof shall be binding on the parties. The Arbitrator / Arbitrators shall give a reasoned award.

Work under the Contract shall be continued by the Selected bidder during the arbitration proceedings unless otherwise directed in writing by the Bank unless the matter is such that the work cannot possibly be continued until the decision of the arbitrator or of the umpire, as the case may be, is obtained and save as those which are otherwise explicitly provided in the Contract, no payment due to payable by the Bank, to the Selected bidder shall be withheld on account of the ongoing arbitration proceedings, if any unless it is the subject matter or one of the subject matters thereof. The venue of the arbitration shall be at KOLKATA, INDIA.

5.24 Applicable law & Jurisdiction of court

The Contract with the Selected bidder shall be governed in accordance with the Laws of India for the time being enforced and will be subject to the exclusive jurisdiction of Courts at Kolkata (with the exclusion of all other Courts).

5.25 Signing of Integrity Pact

Central Vigilance Commission (CVC) vide circular no. 015/VGL/012/-276469 dated 25.02.2015 has directed adoption of Integrity pact in Public Sector Banks.

Integrity Pact essentially envisages an agreement between the prospective vendors/Bidders and the buyer committing the persons/officials of both the parties not to exercise any corrupt influence on any aspect of the contract. Only those vendors/bidders who have entered into such an integrity pact with the buyer would be competent to participate in the bidding. In other Words, entering into this pact would be a preliminary qualification. The integrity pact in respect of a particular contract would be effective from the stage of invitation of bids till the complete execution of the contract.

Independent External Monitors (IEMs) for UCO Bank will be selected by CVC and the same is in process and will be informed once the selection process is completed. Format of Integrity Pact to be submitted along with the technical bid is enclosed.

Technical Requirements

Required Minimum Technical Features of Router- Type A

Sl. No.	Required Featured by the Bank	Yes/No
1	Chassis based & modular architecture for scalability and should be a single box configuration for ease of management.	
2	Should have a dedicated console port and USB port for storage of configuration/image.	
3	Should have at least 1 Nos. 10/100/1000 Mbps Ethernet interfaces.	
4	Should have at least 2 No. of Gigabit Ethernet WAN Port.	
5	Routers should have at least 1 open slots for V.35 serial interfaces	
6	Should support debugging capabilities to assist in problem resolution	
7	Should have hardware assisted VPN acceleration.	
8	Router should support minimum 10Mbps real world WAN bandwidth with all the services enabled on the router	
9	Should have other IP Services like GRE tunneling, ACLs, IPSEC VPNs, NAT services, Router should support HSRP or VRRP for redundancy	
10	Should support Firewall features (transparent and bridging).	
11	Routers should have Class-based queuing	
12	Routers should have marking, policing and shaping.	
13	Routers should support Voice traffic optimization with features like WRED, Modular QoS or equivalent and RSVP.	
14	Routers should have IPV6 compliance from day one	
15	Routers should IPv6 transport packets between IPv6-only and IPv4-only endpoints, ICMPv6, IPv6 DHCP.	
16	Support for the following IP v6 features : RIP NG , OSPF v3 , BGP Support for V6, IP V6 Dual Stack, NAT 64, IP v6 Policy based Routing, and IP v6 QoS, SNMP V3 over IPv6	
17	Router should support protocols like IPv4, IPv6, VRRP, Static Routes, RIPv1, RIPv2, OSPF, IS-IS, BGP, MBGP, BFD, Policy based routing, IPv4 and IPv6 tunneling from day 1	
18	The router should be capable of WAN protocols like PPP, Multilink PPP, etc.	
19	Dynamic Host Control Protocol (DHCP) server/relay/client	
20	Dynamic DNS Support	
21	Support for 802.1q VLANs, Demilitarized Zone (DMZ)	
22	Should have IGMP v1/v2/v3, PIM-DM, PIMSM, Source Specific Multicast (SSM)	
23	Routers should have Configuration rollback	
24	Should support network traffic accounting, usage-based network billing, network planning, security, Denial of Service	

	(DoS) monitoring capabilities and network monitoring.	
25	Should have extensive support for SLA monitoring for metrics like delay, latency, jitter, packet loss, RTP-Based VoIP traffic, CRTP..	
26	Routers should support Software upgrades as and when necessary	
27	Routers should have SNMPv2 and SNMPv3	
28	Routers should have AAA authentication using RADIUS and TACACS	
29	Routers should have Packet Filters like: Standard ACL, Extended ACL, Time range ACL"s etc.	
30	Router should support advanced application inspection and control	
31	Routers should have Tunnels (GRE, IPSec)	
32	The router should support IPSec Framework for Secured Data tansfer Key Exchange : Internet Key Exchange (IKE), IKEv2, Pre-Shared Keys (PSK), Public Key Infrastructure PKI (X.509), RSA encrypted nonces etc, IPSec Data Encapsulation AH and ESP	
33	NAT transparency, Firewall support for clients	
34	IPSec 3DES termination/initiation, IPSec passthrough	
35	Routers should have DES, 3DES, AES (256 bit) encryption, Authentication Algorithm: SHA1 and SHA2, Group: Diffie-Hellman (DH) Group 1, 2, 5	
36	Routers should have generation of SNMP traps and syslog	
37	Routers should have Network address translation (NAT) and PAT	
38	Extensive debugs on all protocols	
39	Shall have Secure Shell for secure connectivity	
40	Should have out of band management through console and an external modem for remote management	
41	Management should support : Telnet, Simple Network Management Protocol (SNMP), CLI/Web based HTTP management, RADIUS	
42	Attach solution document containing detailed bill of material (make, model, OS details: version, date of release, date of release of next version, end of sale & support date, product development path, etc.)	
43	Solution should integrate seamlessly with Bank's existing network Infrastructure.	
44	Should have 3 years warranty service. Product must not be End of Life and Support for next 3 years. If offered product declared End of Life and Support within 3 years contact period, then bidder should provide latest product with same specification or higher without any cost to the Bank. Offer product must not be End of Life and Support for next 5 years.

Required Minimum Technical Features of Switch Type A

Sl. No.	Required Featured by the Bank	Yes/No
1	Chassis based & modular architecture for scalability and should be a single box configuration for ease of management.	
2	Switch should have minimum 150 Gbps Switching capacity all the services enabled on switch.	
3	Switch must support VCS or VSS or equivalent architecture by which two separate switches placed in two different locations can be combined in a single switch fabric and managed as	

	single switch.	
4	Switch should support IPv4 and IPv6 switching and routing in hardware from day 1.	
5	Switch should have minimum 24 10/100/1000 Mbps Ethernet port , 2 1G SFP Port.	
6	IEEE 802.1Q VLAN encapsulation. Upto 64 VLANs should be supported. Support for 4000 VLAN IDs. Centralized VLAN Management. VLANs created on the Core Switches should be propagated automatically. Should support 802.1d, 802.1s, 802.1w, 802.3ad, Port Aggregation Protocol (PAgP), Link Aggregation Protocol (LACP). Support for Detection of Unidirectional Links and to disable them to avoid, Per-port broadcast, multicast, and storm control to prevent faulty end stations from degrading overall systems performance.	
7	Support for minimum 1000 MAC addresses	
8	Should support Private VLAN , VLAN Aggregation , Translation and 802.1v	
9	Must support Layer2 Ping and Layer 2 Traceroute for connectivity and Fault Management Must support multicast Traceroute.	
10	Should support SNMP and syslog Notification for MAC addition, deletion and movement across ports	
11	Support for IP Unicast routing protocols (static, RIP v1 & v2, OSPF, ISIS, BGP).	
12	Should support NAT, PAT, DHCP	
13	Should have out of band management through console and an external modem for remote management	
14	Management should support : Telnet, Simple Network Management Protocol (SNMP), CLI/Web based HTTP management, RADIUS	
15	Attach solution document containing detailed bill of material (make, model, OS details: version, date of release, date of release of next version, end of sale & support date, product development path, etc.)

Required Minimum Technical Features of Firewall

Sl. No.	Required Featured by the Bank	Yes/No
1	Chassis based & modular architecture for scalability	
2	Firewall should have at least 6 no. of GE ports	
3	The appliance should be capable of providing Firewall, VPN Services and Next Generation Firewall feature	

4	The platform should support VLAN tagging (IEEE 802.1q)	
5	Should have a 64Bit Multi-Core Processor and should not be ASIC based architecture.	
6	The platform shall have dedicated interface for out-of bound management	
7	The Firewall should support CA functionality	
8	Support for minimum 1000 MAC addresses	
9	Firewall performance should be minimum 20 Gbps (realworld throughput)	
10	Firewall should be capable configuring Policies using Command Line (CLI) as a last resort in case of Emergency.	
11	Firewall should support minimum 500,0000 concurrent connections	
14	Firewall should support minimum 100000 new conections per second (cps)	
15	deliver VPN throughput minimum 300 Mbps	
16	Should support grouping of physical interfaces withing and across Fixed and Expansion ports into one single physical or logical interface	
17	Firewall should support memory atleast 8 GB Memory for better and faster processing.	
18	Should be open architecture based on multi-core cpu's to protect & scale against dynamic latest security threats.	
19	The firewall shall be deployed in high availability mode (hot stand-by redundancy), have fault tolerance and shall provide stateful failover	
20	The firewall shall have a powerful OS that is hardened and is based upon minimal feature sets.	
21	There shall be support for traffic based and user based access control.	
22	The broad default policy for the firewall for handling inbound traffic shall be to block all packets and connections unless the traffic type and connections have been specifically permitted	
23	It shall support SNMP (Simple Network Management Protocol) v 2.0 and v 3.0.	
24	Firewall should support Single Sign On (SSO)	
25	Should support translating between IPv4 and IPv6 for the following inspections: DNS, FTP,ICMP,HTTP	
26	Network address translation (NAT) shall be supported so that the private IP addresses of hosts and the structure of an internal network can be concealed by the firewall.	
27	Network Address Translation (NAT) shall be configurable as 1:1, 1: many, many: 1, many:many, flexible NAT (overlapping IPs). Reverse NAT shall be supported.	
28	Port address translation/Masquerading shall be provided for	
29	Dynamic Host Configuration Protocol (DHCP) over Virtual Private Network (VPN) shall be supported for dynamic allocation of IP addresses.	

30	The firewall shall support a number of routing options and configurations. Routing protocol support shall include static routes, Open Shortest Path First (OSPF), RIPv1/v2 etc.	
31	Virtual LAN (VLAN) support, high port density, WAN support and expandability of interfaces over time are some important network integration features shall be supported.	
32	The firewall IP stack shall be IPv6 ready.	
33	The firewall shall mask the internal network from the external world.	
34	The firewall shall provide robust access control capability and be fast in making access control decisions. Access Control shall be done based on criteria such as source, destination IPs, port number, protocol, traffic type, application, date information (day of week, time of day), etc	
35	Multi-layer, stateful, applicationbased filtering shall be done	
36	It shall provide network segmentation features with powerful capabilities that facilitate deploying security for various internal, external and DMZ (Demilitarized Zone) sub-groups on the network, to prevent unauthorized access	
37	There shall be support for detection of reconnaissance attempts such as IP address sweep, port scanning etc.	
38	Firewall itself shall be resistant to attack and shall have protection against firewall evasion techniques.	
39	Some basic attack protection features listed below but not limited to : Maximum no of protections against attacks that exploit weaknesses in the TCP/IP protocol suite It shall enable rapid detection of network attacks TCP reassembly for fragmented packet protection Brute force attack mitigation . SYN cookie protection , SYN Flood, Half Open Connections and NUL Packets Protection against IP spoofing Malformed packet protection Java blocking, and real-time alerts	
40	Full H.323v1-5 (Firewall Traversal), SIP (Session Initiation Protocol), gatekeeper support, outbound bandwidth management, full interoperability with common and popular VoIP/VC gateway and communications devices shall be supported, apart from supporting all protocols.	
41	The firewall shall support Internet Protocol Security (IPSec) & SSL	
42	Key exchange with latest Internet Key Exchange (IKE), IKEv2, Public Key Infrastructure PKI (X.509) shall be catered to.	
43	Site-to-site VPN tunnels: full-mesh / star topology shall be supported.	
44	Support Latest Encryption algorithms including AES 128/192/256(Advanced Encryption Standards), 3DES(Data Encryption Standard) etc.	

45	Support Latest Authentication algorithms including SHA-1(Secure Hash Algorithm-1), SHA-2(Secure Hash Algorithm-2) etc.,	
46	IPSec NAT traversal shall be supported.	
47	VPN supporting atleast 300 IPSec / SSL VPN peers	
48	The solution should support the following File/Media Types for Malware identification: PDF, ZIP, 7Z, RAR, CAB, PKZIP, EXE, DLL, SYS, SCR, CPL, OCX, Java, Flash, MS office files.	
49	The solution should support down selection and only analyzes files deemed suspicious.	
50	The solution should have the ability to heuristically detect and decode the presence of shell code	
51	The solution should have the ability to detect and scan pdf files for embedded code	
52	The solution should have capability to fully reveal malware's current and potential payloads.	
53	The solution should provide detection, analysis and repair capability against malware-based attacks	
54	The solution should provide a detailed list of every DLL and API referenced, all header information about the binary, and complete assembly-language listing of the binary code.	
55	The solution should provide reports to shows all the activities the malware code performs related to file systems, Windows registry, network operations, Processes and any other miscellaneous operations	
56	The solution should provide summary for instance, whether the malware wrote into a certain file, modified a registry setting, opened a port or communicated to a specific url, or changed the name of a running process to hide itself.	
57	The solution should identify any logic bombs (time based execution delays) hidden in the malware waiting for a trigger to cause damage at a later time	
58	The solution should provide the ability to upload gold image and analyze threats under conditions of actual host environment.	
59	Solution should provide Detailed Technical Report, Behavior Summary Report and a Logic Execution Path Map.	
60	The solution should recognize new variants of existing malware families and identify new families.	
61	The Solution should support the following multiple advanced malware analysis methods:	
62	Solution should provide high Threat protection rate minimum of 99%.	
63	The solution shall give CVE number for the Intrustion events detected and shall capture packet for each intrusion event	
64	The solution should automatically map event to the IP, Geography information, to the user, system affected	
65	The solution must be capable of significantly reducing operator	

	effort and accelerating response to threats by automatically prioritizing alerts, ideally based on the potential for correlated threats to successfully impact the specific hosts they are directed toward.	
66	The IPS detection methodologies shall consist of Signature based detection using real time updated database & Anomaly based detection that is based on thresholds	
67	The proposed system shall support One-arm IDS (sniffer mode)	
68	The device shall allow administrators to create Custom IPS signatures	
69	Consists of vendor's original threat intelligence and is not overly dependent on information available in the public domain.	
70	Is continuously updated with new threat intelligence, including detailed help text, in an automated fashion and without physical access to the unit.	
71	Security information is meaningful, comprehensive and freely available to customers and non-customers via a publicly accessible database.	
71	Detects and blocks all known, high risk exploits along with their underlying vulnerability (not just one exploit of that vulnerability).	
73	Allows users to control the number of times a sensor notifies the console when a flood type attack occurs. For example, the sensor must be configurable to send a single alert every five minutes vs. sending an alert for every single packet associated with the attack. This will avoid overwhelming the console and the internal network with alerts.	
74	Must be capable of performing packet-level forensics and capturing raw packet data in response to individual events	
75	The detection engine must support multiple options for directly responding to events, such as monitor only, block offending traffic, replace packet payload, and capture packets	
76	The solution must be capable of passively gathering information about session flows for all monitored hosts, including start/end time, ports, services, and amount of data.	
77	Accurately detects intrusion attempts and discerns between the various types and risk levels including unauthorized access attempts, pre-attack probes, suspicious activity, DoS, DDoS, vulnerability exploitation, brute force, hybrids, and zero-day attacks.	
78	Detection rules must be based on an extensible, open language (API) that enables users to create their own rules, as well as to customize any vendor-provided rules.	
79	Detection rules provided by the vendor must be documented, with full descriptions of the identity, nature, and severity of the associated vulnerabilities and threats being protected against.	
80	The detection engine must be capable of detecting and preventing a wide variety of threats (e.g., malware, network probes/reconnaissance, VoIP attacks, buffer overflows, P2P	

	attacks, zero -day threats, etc.)which require license for cloud sandboxing feature with hash only	
81	The detection engine must incorporate multiple approaches for detecting threats, including at a minimum exploit -based signatures, vulnerability -based rules, protocol anomaly detection, and behavioral anomaly detection techniques. Identify and explain each type of detection mechanism supported.	
82	The detection engine must inspect not only Network Layer details and information resident in packet headers, but a broad range of protocols across all layers of the computing stack and packet payloads as well.	
83	The detection engine must be resistant to various URL obfuscation techniques common to HTML -based attacks	
84	The solution must be capable of detecting and blocking IPv6 attack	
85	The solution must provide IP reputation feed that comprised of several regularly updated collections of IP addresses determined by the proposed security vendor to have a poor reputation.	
86	The solution should be capable of providing network -based detection of malware by checking the disposition of known files in the cloud using the SHA -256 file -hash as they transit the network (SHA -256 and target IP address should be given to aid remediation efforts) with enabling justadvance malware license if require in near future	
87	The solution must be capable of passively gathering information about network hosts and their activities, such as operating system, services, open ports, client applications, and vulnerabilities, to assist with multiple activities, such as intrusion event data correlation, elimination of false positives, and policy compliance.	
88	The solution must be capable of passively gathering information about session flows for all monitored hosts, including start/end time, ports, services, and amount of data.	
89	The solution must be capable of storing user -defined host attributes, such as host criticality or administrator contact information, to assist with compliance monitoring.	
90	The solution must be capable of passively gathering user identity information, mapping IP addresses to username, and making this information available for event management purposes.	
91	The solution must be capable of passively gathering details unique to mobile devices traffic to identify a wide variety of mobile operating systems, mobile applications and associated mobile device hardware.	
92	The solution must provide a detailed, interactive graphical summary that includes data on applications, application statistics, connections, intrusions events, hosts, servers, users, file -	

	types, malwares and relevant URLs. These data should be presented in the form of vivid line, bar, pie and donut graphs accompanied by detailed lists (Administrator should easily create and apply custom filters to fine -tune the analysis).	
93	Appliance have capacity to block source based on geo - location	
94	The solution must be capable of employing an extensive set of contextual information (e.g., pertaining to the composition, configuration, and behavior of the network and its hosts) to improve the efficiency and accuracy of both manual and automatic analysis of detected events.	
95	The solution must be capable of significantly reducing operator effort and accelerating response to threats by automatically prioritizing alerts, ideally based on the potential for correlated threats to successfully impact the specific hosts they are directed toward.	
96	The solution must be capable of dynamically tuning IDS/IPS sensors (e.g., selecting rules, configuring policies, updating policies, etc.) with minimal human intervention.	
97	Should have identification support for atleast 3000 applications and the identification should be regardless of ports. The application needs to be predefined on the box.	
98	The proposed system shall have the ability to identify, block the following common P2P applications : Gnutella (Napshare, iMesh, Mldonkey, morph, Xolox, BearShare, FOXY), Bittorrent, Kaaza, WinY, edonkey).	
99	The solution must integrate application control to reduce risks associated with applications usage and client -side attacks. It should provide a means of enforcing acceptable use policies of up to 3000 application detectors.	
100	The solution must support creation of user -defined application protocol detectors.	
101	The solution must have content awareness with comprehensive file detection policies and blocking of files by types, protocols and directions.	
102	The proposed solution should provide an option to include URL filtering for enforcing Internet content filtering so as to reduce web born threats and improve productivity.	
103	Each URL in the data set must has an associated category and reputation. URL category is a general classification for the URL while URL reputation represents how likely the URL is to be used for purposes that might be against the organization's security policy.	
104	The solution must be capable of easily identifying all hosts that exhibit a specific attribute or non - compliance condition.	
105	The solution must provide a full - featured NBA capability to detect threats emerging from inside the network This includes the ability to establish "normal" traffic baselines through flow	

	analysis techniques (e.g., NetFlow) and the ability to detect deviations from normal baselines	
106	The NBA capability must provide visibility into how network bandwidth is consumed to aid in troubleshooting network outages and performance degradations.	
107	The NBA capability must provide the ability to link Active Directory and/or LDAP usernames to IP addresses related to suspected security events.	
108	The same network devices used for IPS must also be used as part of the NBA capability. No NBA -only device should be required.	
109	The same management platform used for IPS must also be used to manage the NBA capability. No NBA-only management components should be required.	
110	The management platform must be capable of centralized, life cycle management for all NGFW services/devices.	
111	The management platform must be delivered in virtual appliance form factor (management system and UI must provide the same features and functions as in the physical appliance).	
112	The management platform must be capable of aggregating IDS/IPS events and centralized, real-time monitoring and forensic analysis of detected events.	
113	The management platform must be accessible via a web-based interface and ideally with no need for additional client software.	
114	The management platform must provide a highly customizable dashboard.	
115	The management platform must be capable of integrating third party vulnerability information into threat policy adjustment routines and automated tuning workflows.	
116	The management platform must be capable of role-based administration, enabling different sets of views and configuration capabilities for different administrators subsequent to their authentication.	
117	The management platform must include a scheduling subsystem to facilitate automation of routine tasks, such as backups, upgrades, report creation, and policy application.	
118	The management platform must include one or more default (i.e., pre-defined) detection policy configurations to help simplify initial deployment.	
119	The management platform must provide the capability to easily view, enable, disable, and modify individual rules, as well as groups or categories of rules.	
120	The management platform must be capable of automatically receiving rule updates published by the vendor and automatically distributing and applying those rule updates to sensors.	
121	The management platform must be capable of backup and	

	rollback for sensor configurations and the management platform itself.	
122	The management platform must include flexible workflow capabilities for managing the complete life cycle of an event, from initial notification through to any response and resolution activities that might be required.	
123	The management platform must provide the ability to view the corresponding detection rule for each detected event, along with the specific packet(s) that caused it to be triggered.	
124	The management platform must support both internal and external databases/systems for storage of event data, logs, and other systemgenerated information..	
125	The management platform must be capable of synchronizing time between all components of the system via NTP.	
126	The management platform must be capable of logging all administrator activities, both locally and to a remote log server.	
127	The solution must support LDAP for single sign-on to sensors and the management console.	
128	The management platform must provide robust reporting capabilities, including a selection of pre-defined reports and the ability for complete customization and generation of new reports.	
129	The reporting tool needs to be bundled or quoted along with the solution.The logging and analysis should either be an appliance or on a dedicated PC/ Server platform. The bidder should take the responsibility of supplying the hardware and the OS with suitable warranty.	
130	The management platform must allow quick report customization by importing from dashboards, workflows and statistics summaries.	
131	The management platform must provide multiple report output types or formats, such as PDF, HTML, and CSV.	
132	The management platform must support multiple mechanisms for issuing alerts (e.g., SNMP, e-mail, SYSLOG).	
133	Firewall should able to handle all ATM, NPCI, Payment gateway traffic at existing Bank's Network.	
134	Attach solution document containing detailed bill of material (make, model, OS details: version, date of release, date of release of next version, end of sale & support date, product development path, etc.)	
135	Solution should integrate seamlessly with Bank's existing network Infrastructure.	
136	Should have 3 years warranty service. Product must not be End of Life and Support for next 3 years. If offered product declared End of Life and Support within 3 years contact period, then bidder should provide latest product with same specification or higher without any cost to the Bank. Offer product must not be End of Life and Support for next 5 years	

Required Minimum Technical Features of IPS

Sl. No.	Required Featured by the Bank	Yes/No
1	IPS should The appliance should be rack mountable and support side rails if required	
2	Proposed Intrusion Prevention System should have at least 4x10/100/1000 interfaces	
3	IPS device should have console port and USB Ports	
4	Proposed IPS appliance should be supplied with minimum of 16 GB RAM and can be upgradable to 24 GB in future if required	
5	The proposed device should have Intrusion prevention sensors delivering a minimum of 10 Gbps of context-aware , real-world traffic inspection	
6	IPS device should perform stateful pattern recognition to identify vulnerability-based attacks through the use of multi-packet inspection across all protocols.	
7	The proposed IPS must perform protocol decoding and validation for network traffic including: IP, TCP, UDP, and ICMP.	
8	IPS should provide anomaly identification for attacks that may cover multiple sessions and connections, using techniques based on identifying changes in normal network traffic patterns	
9	Should support creation of baseline of normal network traffic and then uses baseline to detect worm-infected hosts	
10	Should support creation of baseline of normal network traffic and then uses baseline to detect worm-infected hosts	
11	Must be able to identify Layer 2 Address Resolution Protocol (ARP) attacks and man-in-the-middle attacks	
14	The sensors should be able to detect attacks running inside of these tunnelling protocols such as GRE, IP-in-IP, MPLS, and IPv4/IPv6.	
15	The IPS should be able to inspect SSL/https traffic	
16	Can exceptions be setup to filter out, fine-tune or adjust the actions for specific attacker or destination IP on a per signature basis	
17	The proposed product should be resistant to IPS evasion and protection from anti-NIPS (Network Intrusion Prevention System) techniques.	
18	Proposed IPS should support a minimum of average inspection throughput of 10 Gbps	
19	The average latency of the proposed IPS should be less than 150 microseconds	
20	IPS must support a minimum of 5 million concurrent connections.	
21	Support more than 1, 00,000 new sessions per second processing	
22	Proposed solution should have automatic bypass for IPS in case of performance suffer beyond defined administrative threshold or IPS function/engine fails	

23	IPS should have the functionality of Software Fail Open.	
24	IPS Software Fail Open functionality can be defined in terms Gateway Threshold of Memory or CPU and should have an option to trigger the mail if required.	
25	The IPS should support Active/Active and Active/ Standby High Availability feature.	
26	Proposed IPS solution must be capable to detect device failure, link and path failure	
27	IPS appliance failover should be complete stateful in nature without any manual intervention	
28	Proposed IPS solution should support Vulnerability and Exploit signatures, Protocol validation, Anomaly detection, Behaviour-based detection, Multi-element global correlation and reputation based filtering	
29	IPS profile can be defined to Deactivate protections with Severity, Confidence level, Performance impact, Protocol Anomalies	
30	IPS Profile should have an option to select or re-select specific signatures that can be deactivated	
31	Intrusion Prevention should have the option to add exceptions for network and services.	
32	IPS should provide rate shaping to prioritize known, normal traffic flows and unknown traffic flows	
33	IPS Policy to Block the traffic by country should have an option to configure in incoming direction, Outgoing direction or both.	
34	IPS events/protection exclusion rules should be created and the packet data should be viewed directly from log entries.	
35	Application Intelligence should have controls for Instant Messenger, Peer-to-Peer, Malware Traffic etc.	
36	Instant Messenger should have options to Block File Transfer, Block Audio, Block Video, Application Sharing and Remote Assistance	
37	The proposed IPS should have an option to create your own signatures with an open signature language	
38	IPS should provide detailed information on each protection, including: Vulnerability and threat descriptions, Threat severity, Performance impact, Release date, Industry Reference, Confidence level etc.	
39	Proposed IPS must have an embedded GUI Based Management interface.	
40	Proposed IPS should have the options of policy configuration, event management, health management and reporting.	
41	IPS device should have features to prioritize and send alerts to users after an alert action is taken place	
42	Proposed IPS should be constantly updated with new defences against emerging threats.	
43	IPS updates should have an option of Automatic downloads and scheduled updates so that it can be scheduled for specific	

	days and time	
44	Should have flexibility to define newly downloaded protections will be set in Detect or Prevent mode.	
45	Activation of new protections based on parameters like Performance impact, Confidence index, Threat severity etc	
46	Attach solution document containing detailed bill of material (make, model, OS details: version, date of release, date of release of next version, end of sale & support date, product development path, etc.)	
47	Solution should integrate seamlessly with Bank's existing network Infrastructure.	
48	Should have 3 years warranty service. Product must not be End of Life and Support for next 3 years. If offered product declared End of Life and Support within 3 years contact period, then bidder should provide latest product with same specification or higher without any cost to the Bank. Offer product must not be End of Life and Support for next 5 years.	

Required Minimum Technical Features of WAN Optimization

Sl. No.	Required Featured by the Bank	Yes/No
1	The WAN Optimization device should be based on dedicated Appliance. Rack mounting kit should be supplied along with the appliance	
2	Should have minimum 6 x 10/100/1000 Base-T Ports for inline deployment with fail-to-wire capability. In total 6 ports are required from day one	
3	Should support optimization for minimum of 10,000 concurrent TCP connections from day one, with scalability option when configured in full transparency mode. Further Bidder shall ensure that there is no application performance issue and should compress all types of application traffic i.e. Finacle, ATM, Mail Messaging (Exchange 2010), OBCWEB Portal, etc. originating from Branch/office locations till Primary Data Center, Bangalore and Disaster Recovery Site, Kolkata. The WAN Optimization solution is being procured for 4 international Branches.	
4	Should support a minimum compressed throughput (WAN throughput) of 1000 Mbps from day one	
5	Should have 48 GB RAM from day one. During the contract period the Bidder shall ensure that there is no performance issue because of memory requirement. Incase any such issues are observed the Bidder shall provide additional memory and Bank shall not pay for the same	
6	The Appliance should able to peer with multiple type of remote devices including, Appliance, Virtual Appliance, Router integrated WAN Optimization solution etc.	
7	Should have Redundant Power Supply.	

8	Should support Transport flow TCP optimization to improve application packet flow under unfavorable WAN Condition such as packet loss and small initial windows. Should support any TCP based applications	
9	Should support advance network compression that uses a bidirectional database to store previously seen TCP traffic and replace redundant patterns with very small signatures.	
10	Should support re-transmission of lost Data in case of packet-loss.	
11	The Caching Architecture should be flexible to accommodate and prioritize next generation applications like VDI, Video, HTTP etc .	
14	Should allow to configure Bidirectional Caching i.e. caching in DC end Appliance & Branch end Appliance for specific protocols like FTP, HTTP, Email etc	
15	Single instance store - Solution should support single universal dictionary for maintaining larger histories without requiring per peer data store. Architecture of the solution must ensure that single copy of any content is maintained irrespective of the peer is being sent to	
16	Content aware de-duplication: The solution must provide Content Aware De-Duplication with ability to distinguish protocol & applications. At the same time it must preserve TCP/IP information like Source & Destination IP Address, Source Port & Destination port & DSCP marking while optimizing the traffic	
17	Should support compression with a connectionoriented compression history to further reduce the amount of bandwidth consumed by a TCP connection	
18	Should support integration with network management and monitoring systems.	
19	The WAN Optimization solution should be transparent to NetFlow export on the router or intermediary devices.	
20	Should support peering along with presence in management domain for up to minimum of 500 branches with WAN optimization devices.	
21	The Solution should support advance optimization for CIFS protocol including following features;- Safe data & Meta Data Caching for higher optimization and data coherency; Read-ahead & message Pipelining to mitigate send-and-wait behavior of CIFS	
22	The Solution should support MAPI Acceleration to improve email delivery, calendaring, contacts access over WAN. It should have following features	
23	Advance Email Compression & Object delivery acceleration	
24	Should provide optimization transparently requiring no change to existing infrastructure.	
25	The solution should provide HTTP & HTTPS Acceleration with	

	following features;- Should support "Pre-Cache Acceleration" (PCA) which helps speed up the rendering of Web pages by eliminating repetitive trips over the WAN connection to validate the freshness of content. client"s browser must query the remote server with an HTTP 304 request for the "freshness value" of the object	
26	Should support TCP optimization for efficient data transfer across WAN, higher bandwidth utilization, faster recovery after any packet loss. TCP optimization must include Windows Scaling, Slow start with congestion avoidance, Fast Convergence & Selective acknowledgements to ensure efficient throughput in Long FAT Networks	
27	Should support local response based on cached metadata from previously seen server responses & Server Compression.	
28	The solution should preserve trust boundaries by not distribute private keys beyond the data center device while optimizing SSL/HTTPS traffic	
29	All certificates and private keys should be stored securely on the Data Center Devices	
30	HTTPs acceleration: Support for HTTPS application acceleration blueprint to address protocol chattiness and performance issues. Solution must able to intercept the HTTPS traffic for content deduplication and protocol optimization.	
31	The solution must support acceleration for Server Message Block Version 2 (SMBv2) and signed SMBv2 protocols.	
32	The Solution should support NFS Acceleration with Metadata optimization, Read-ahead optimization, File write optimization etc	
33	Should integrate with existing network devices like router & firewalls transparently	
34	Should preserve network information like Source IP, Destination IP, Source Port, Destination Port, QOS marking throughout the network.	
35	Should support following deployment model to suite any Branch environment Inline Deployment with fail to wire functionality WCCP V2 redirection with Routers & Switches or equivalent Policy Based Redirection (PBR) with Routers & Switches or Equivalent	
36	Should automatically discover remote peers, reducing configuration steps.	
37	Should support configuration backup and restore in event of hardware failure by using central management device	
38	Should support environments with redundant WAN links, redundant routers, and asymmetric routing to improve high availability and optimization efficiency	
39	Should be completely transparent to different type of routing	

	including Static routing, Dynamic routing, optimized routing etc	
40	Should integrate with existing IPSec VPN framework architecture .As on date the IPSEC/3DES is enabled between Bank's branches and Data Centers.	
41	**Branch Wan Optimizer**: Branch solution should have WAN optimization functionality from day one through external appliance for supporting minimum of 150 Concurrent TCP Connections for each of 4 No of International Branches with concurrent users upto 30 per branch. For 4 branches with concurrent users more than 20 per branch , WAN optimization should support minimum of 120 TCP connections. WAN Optimization solution should have the capability to seamlessly integrate & optimize IPsec VPN interested traffic along with application acceleration supporting applications i.e. Finacle, ATM, Mail Messaging (Exchange 2010), WEB Portal,etc. originating from Branch/office locations. The WAN Optimization solution is being procured for 4 international Branches.	
42	Attach solution document containing detailed bill of material (make, model, OS details: version, date of release, date of release of next version, end of sale & support date, product development path, etc.)	
43	Solution should integrate seamlessly with Bank's existing network Infrastructure.	
44	Should have 3 years warranty service. Product must not be End of Life and Support for next 3 years. If offered product declared End of Life and Support within 3 years contact period, then bidder should provide latest product with same specification or higher without any cost to the Bank. Offer product must not be End of Life and Support for next 5 years.	

Required Minimum Technical Features of Leased Line Modem

Sl. No.	Required Featured by the Bank	Yes/No
1	The modems should be TEC/DOT Type approved. Bidder has to submit the documentary evidence to support his claims.	
2	Standalone or Rack Mountable Modems, with suitable cabling are required for the bank locations for installation at bank locations and service provider end.	
3	The modems at the bank locations and service provider end should support the : V.35 Modem at CPE (Consumer Premise End) Modem should support x.21, V.35 DCE/DTE interface or E1 Interface G.703 Modem at Service Provider End	
4	Should Operates in Full Duplex mode over 2- wire/4 wire Lines, enabling service over any copper infrastructure	
5	Operates at multiple data rates between 64 Kbps and 2MBPS	

6	Modular plug and play DTE interfaces for maximum flexibility and efficient stock management.	
7	Various DTE interfaces Like: X.21, V.35, RS-530, and G.703/G.704 E1/T1.	
8	Management via: V.24/RS-232 terminal port,10/100BaseT out of Band Management, Dial In, Dial Out	
9	Provides extensive diagnostics, including loop backs, SHDSL and E1 performance monitoring. Should Support SNMP agent, Should support telnet and Web Browser.	
10	Loopbacks: Local analog loopback in compliance with ITU V.54. b) Remote digital loopback in compliance with ITU V.54	
11	LEDs for power, line & loopback	
12	Attach solution document containing detailed bill of material (make, model, OS details: version, date of release, date of release of next version, end of sale & support date, product development path, etc.)	
13	Solution should integrate seamlessly with Bank's existing network Infrastructure.	
14	Should have 3 years warranty service. Product must not be End of Life and Support for next 3 years. If offered product declared End of Life and Support within 3 years contact period, then bidder should provide latest product with same specification or higher without any cost to the Bank. Offer product must not be End of Life and Support for next 5 years.	

Required Minimum Technical Features of Internet Proxy Solution

Sl. No.	Required Featured by the Bank	Yes/No
1	The solution must Appliance based or run on physical servers and support minimum of 500 concurrent users from the day one and scalable up to 4000 concurrent users without changing hardware.	
2	Should have 3 years warranty service. Product must not be End of Life and Support for next 3 years. If offered product declared End of Life and Support within 3 years contact period, then bidder should provide latest product with same specification or higher without any cost to the Bank	
3	The solution should be a on premise Secure Web Gateway solution having Proxy, user based URL filter, user based Application filtering on mobile devices like blocking of WhatsApp, Caching, SSL Inspection, Anti-Virus, Antimalware, spyware blocking, blocking of Peer-Peer applications like Kazaa, Gnutella, Bit Torrent, IRC (over HTTP) , including blocking of voice and video services and real-time protection against zero day threats all in one solution(Appliance or software installed in Server).	
4	The solution should have the feature of Anti-Phishing, Real-time Security Scanning, URL Database Filtering, and Malicious Browser	

	Codes, Application, Protocol Control and Classification, Scanning and filtering of Real-Time Social Networking and Web 2.0 Security like Facebook, LinkedIn, and other Web 2.0 destinations.	
5	The solution will be deployed on physical servers (not Virtual systems) / appliance and should be manageable through single unified management console. Solution should support Real-Time Session tracking.	
6	The solution should monitor all HTTP and HTTPS traffic. Should detect & block spyware access to the Internet	
7	The solution should be capable to enforce safe-search restrictions for major image search engines, independent of cookies or other settings on the client machines	
8	The solution should have forward and reverse proxy and caching facility including but not limited to • HTTP • Native FTP • FTP Over HTTP	
9	The solution should be able to support split DNS to utilize internal and external DNS	
10	The solution should support protocol tunneling	
11	The solution should block binary executable, script based exploits, key loggers etc. that are directed towards the bank's network	
12	The solution allows override entries to be specified with wildcards within the URL. At a minimum, wildcards should be allowed at the beginning of the URL – e.g., *.xyz.com.	
13	The solution should allow override entries to be added by administrators without requiring restart of the system.	
14	The solution should be possible to limit bandwidth usage for specific categories, applications and protocols	
15	The solution should support different deployment modes.	
16	The supplied solution should support HIGH AVAILABILITY mode.	
17	The solution must identify and block webpages with: a. Malicious JavaScript / VB Script b. Malicious (or unauthorized) ActiveX applications c. Block Potentially Unwanted Programs (PUPs) d. Malicious Windows executable	
18	The solution should be able to block proxy avoiding applications/software/websites such as TOR, Ultrasurf, GhostSurf, JAP, RealTunnel etc	
19	The solution should provide proxy, caching, on box malware inspection, content filtering, SSL inspection, protocol filtering on the same device/server.	
20	The solution should have IP spoofing to provide accurate representation of the IP addresses as it exits the proxy	
21	The solution should support all network communication/application protocols & ports like http,https,SMTP,587,SPOP3,443 etc.	
22	The solution must identify and block configurable search strings like: porn, adult, hacking, download, shareware, etc.	

23	The solution must have in built segment wise URL database like Govt., Technical, financial, Shopping, social media etc., for blacklists like Phishing, Malicious, etc. on URL categories. Solution must have real time update.	
24	The solution should have gateway level Antivirus and malware protection	
25	The solution must have flexibility to protect from objectionable, offensive content such as (not limited to) - Religious bias sites - Gambling sites - Hacking sites etc	
26	The solution must provide file filtering for upload/download.	
27	The solution must support different types of compression algorithms and scan nested compressed files.	
28	The solution must have flexibility to monitor and block instant messaging (IM) based file transfer and other granular controls in applications	
29	The solution must provide Web reputation as well as content based blocking/filtering	
30	The solution must be updated automatically with the new signatures from the web at customized user defined interval. A) Virus, B) White list/Blacklist URLs database C) System patches must be made available as and when new stable release is available D) Botnets E) Rootkits F) Malware G)Torr IP Address	
31	The solution must have stringent security to safeguard itself against any attacks from Internet or Intranet.(like Multiple TCP Connections etc.)	
32	The solution must immediately block and alert the user if the content being downloaded/uploaded/accessed is found to contain virus/other malware.	
33	The solution must support, control and recognize all Web application traffic and protect against Web based attacks.	
34	The solution should allow access based on usage time limit. Configurable for each user/group.	
35	The appliance/Software solution should send an alert message to the user, if he/she is trying to access a blocked website or a monitored website. The Message should be configurable by administrator.	
36	The solution must be capable of dynamically blocking a legitimate website which has become infected and unblock the site when the threat has been removed.	
37	The solution should perform dynamic content inspection of web-based content being accessed from otherwise unblocked websites.	
38	The solution should detect and blocks outbound Botnet and Trojan malware communications. It should log and provide detailed information on the originating system sufficient to enable	

यूको बैंक UCO BANK

	identification of infected units for mitigation	
39	The solution should provide real-time classification of uncategorized websites	
40	The Solution should have authentication system (User ID & Password) for accessing website based on IP address of clients.	
41	The solution should have real-time content scanning ability to understand malicious content besides on-box AV and anti-malware	
42	The solution should have ability to detect and block proxy anonymizer services.	
43	The solution should allow for delegable system administration (such as allowing for a user to configure filtering and logging for only their Active Directory or customized group without affecting the remainder of the users).	
44	The solution should provide creation of custom policies to be applied for specific user/s, IP's and group/s.

General

This pre-bid pre-contract Agreement (hereinafter called the Integrity *Pact)* is made on……..day of the month of……, 20___between, on one hand **UCO BANK**, a body corporate constituted under The Banking companies (Acquisition & Transfer Act of 1970), as amended by The Banking Laws (Amendment) Act, 1985, having its Head Office at 10, Biplabi Trailokya Maharaj Sarani , Kolkata-700001 {hereinafter called the "BUYER", which expression shall mean and include, unless the context otherwise requires, his successors in office and assigns) of the First Part and M/s……..represented by Shri……..,…… (hereinafter called the "BIDDER/Seller" which expression shall mean and include, unless the context otherwise requires, his successors and permitted assigns) of the Second Part.

WHEREAS the BUYER proposes to procure (Name of the Stores/Equipment/item) and the BIDDER/Seller is willing to offer/has offered the stores and

यूको बैंक UCO BANK

WHEREAS the BIDDER is a private company/public company/Government undertaking/partnership/registered export agency, constituted in accordance with the relevant law in the matter and the BUYER is a …….Department performing its functions on behalf of **UCO BANK**.

NOW, THEREFORE,

To avoid all forms of corruption by following a system that is fair, transparent and free from any influence/prejudiced dealings prior to, during and subsequent to the currency of the contract to be entered into with a view to :-

Enabling the BUYER to obtain the desired said stores/equipment at a competitive price in conformity with the defined specifications by avoiding the high cost and the distortionary impact of corruption on public procurement, and

Enabling BIDDERS to abstain from bribing or indulging in any corrupt practice in order to secure the contract by providing

assurance to them that their competitors will also abstain from bribing and other corrupt practices and the BUYER will commit to prevent corruption, in any form, by its officials by following transparent procedures.

The parties hereto hereby agree to enter into this Integrity Pact and agree as follows:

Commitments of the BUYER

1.1 The BUYER undertakes that no official of the BUYER, connected directly or indirectly with the contract, will demand, take a promise for or accept, directly or through intermediaries, any bribe, consideration, gift, reward, favour or any material or immaterial benefit or any other advantage from the BIDDER, either for themselves or for any person, organisation or third party related to the contract in exchange for an advantage in the bidding process, bid evaluation, contracting or implementation process related to the contract.

1.2 The BUYER will, during the pre-contract stage, treat all BIDDERs alike, and will provide to all BIDDERs the same information and will not provide any such information to any particular BIDDER which could afford an advantage to that particular BIDDER in comparison to other BIDDERs.

1.3 All the officials of the BUYER will report to the appropriate Government office any attempted or completed breaches of the above commitments as well as any substantial suspicion of such a breach.

2. In case any such preceding misconduct on the part of such official(s) is reported by the BIDDER to the BUYER with full and verifiable facts and the same is prima facie found to be correct by the BUYER, necessary disciplinary proceedings, or any other action as deemed fit, including criminal proceedings may be initiated by the BUYER and such a person shall be debarred from further dealings related to the contract process. In such a case while an enquiry is being conducted by the BUYER the proceedings under the contract would not be stalled.

Commitments of BIDDERS

3. The BIDDER commits itself to take all measures necessary to prevent corrupt practices, unfair means and illegal activities during any stage of its bid or during any pre-contract or post-contract stage in order to secure the contract or in furtherance to secure it and in particular commit itself to the following:-

3.1 The BIDDER will not offer, directly or through intermediaries, any bribe, gift, consideration, reward, favour, any material or immaterial benefit or other advantage, commission, fees, brokerage or inducement to any official of the BUYER, connected directly or indirectly with the bidding process, or to any person, organisation or third party related to the contract in exchange for any advantage in the bidding, evaluation, contracting and implementation of the contract.

3.2 The BIDDER further undertakes that it has not given, offered or promised to give, directly or indirectly any bribe, gift, consideration, reward, favour, any material or immaterial benefit or other advantage, commission, fees, brokerage or inducement to any official of the BUYER or otherwise in procuring the Contract or forbearing to do or having done any act in relation to the obtaining or execution of the contract or any other contract with the Government for showing or forbearing to show favour or dis favour to any person in relation to the contract or any other contract with the Government.

3.3 BIDDERS shall disclose the name and address of agents and representatives and Indian BIDDERS shall disclose their foreign principals or associates.

3.4 BIDDERS shall disclose the payments to be made by them to agents/brokers or any other intermediary, in connection with this bid/contract.

3 5 The BIDDER further confirms and declares to the BUYER that the BIDDER has not engaged any individual or firm or company whether Indian or foreign to intercede, facilitate or in any way to recommend to the BUYER or any of its functionaries, whether

officially or unofficially to the award of the contract to the BIDDER, nor has any amount been paid, promised or intended to be paid to any such individual, firm or company in respect of any such intercession, facilitation or recommendation.

3.6 The BIDDER, either while presenting the bid or during pre-contract negotiations or before signing the contract, shall disclose any payments he has made, is committed to or intends to make to officials of the

BUYER or their family members, agents, brokers or any other intermediaries in connection with the contract and the details of services agreed upon for such payments.

3.7 The BIDDER will not collude with other parties interested in the contract to impair the transparency, fairness and progress of the bidding process, bid evaluation, contracting and implementation of the contract.

3.8 The BIDDER will not accept any advantage in exchange for any corrupt practice, unfair means and illegal activities.

3.9 The BIDDER shall not use improperly, for purposes of competition or personal gain, or pass on to others, any information provided by the BUYER as part of the business relationship, regarding plans, technical proposals and business details, including information contained in any electronic data carrier. The BIDDER also undertakes to exercise due and adequate care lest any such information is divulged.

3.10 The BIDDER commits to refrain from giving any complaint directly or through any other manner without supporting it with full and verifiable facts.

3.11 The BIDDER shall not instigate or cause to instigate any third person to commit any of the actions mentioned above.

3.12 If the BIDDER or any employee of the BIDDER or any person acting on behalf of the BIDDER, either directly or indirectly, is a relative of

any of the officers of the BUYER, or alternatively, if any relative of an officer of the BUYER has financial interest/stake in the BIDDER's firm, the same shall be disclosed by the BIDDER at the time of filing of tender.
The term 'relative' for this purpose would be as defined in Section 6 of the Companies Act 1956.

3.13 The BIDDER shall not lend to or borrow any money from or enter into any monetary dealings or transactions, directly or indirectly, with any employee of the BUYER.

4. Previous Transgression

4.1 The BIDDER declares that no previous transgression occurred in the last three years immediately before signing of this Integrity Pact, with any other company in any country in respect of any corrupt practices envisaged hereunder or with any Public Sector Enterprise in India or any Government Department in India that could justify BIDDER'**S** exclusion from the tender process.

4:2 The BIDDER agrees that if it makes incorrect statement on this subject, BIDDER can be disqualified from the tender process or the contract, if already awarded, can be terminated for such reason.

5. Earnest Money (Security Deposit)

5.1 While submitting commercial bid, the BIDDER shall deposit an amount **(to be specified in RFP)** as Earnest Money/Security Deposit, with the BUYER through any of the following instruments:

(i) Bank Draft or a Pay Order in favour of__ ;

(ii) A confirmed guarantee by an Indian Nationalised Bank, promising payment of the guaranteed sum to the BUYER on demand within three working days without any demur whatsoever and without seeking any reasons whatsoever. The demand for payment by the BUYER shall be treated as conclusive proof of payment.

(iii) Any other mode or through any other instrument (to be specified in the RFP).

5.2 The Earnest Money/Security Deposit shall be valid upto a period of five years or the complete conclusion of the contractual obligations to the

complete satisfaction of both the BIDDER and the BUYER, including warranty period, whichever is later.

5 3 In case of the successful BIDDER a clause would also be incorporated in the Article pertaining to Performance Bond in the Purchase Contract that the provisions of Sanctions for Violation shall be applicable for forfeiture of Performance Bond in case of a decision by the BUYER to forfeit the same without assigning any reason for imposing sanction for violation of this Pact

5.4 No interest shall be payable by the BUYER to the BIDDER on Earnest Money/Security Deposit for the period of its currency.

6. Sanctions for Violations

6.1 Any breach of the aforesaid provisions by the BIDDER or any one employed by it or acting on its behalf (whether with or without the knowledge of the BIDDER) shall entitle the BUYER to take all or any one of the following actions, wherever required:-

(i) To immediately call off the pre contract negotiations without assigning any reason or giving any compensation to the BIDDER. However, the proceedings with the other BIDDER(s) would continue.

(ii) The Earnest Money Deposit (in pre-contract stage) and/or Security Deposit/Performance Bond (after the contract is signed) shall stand forfeited either fully or partially, as decided by the BUYER and the BUYER shall not be required to assign any reason therefore.

(iii) To immediately cancel the contract, if already signed, without giving any compensation to the BIDDER.

(iv) To recover all sums already paid by the BUYER, and in case of an Indian BIDDER with interest thereon at 2% higher than the prevailing Base Rate of UCO Bank, while in case of a BIDDER from a country other than India with interest thereon at 2% higher than the LIBOR. If any outstanding payment is due to the BIDDER from the BUYER in connection with any other contract for any other stores, such outstanding payment could also be utilised to recover the aforesaid sum and interest.

(v) To encash the advance bank guarantee and performance bond/warranty bond, if furnished by the BIDDER, in order to recover the payments, already made by the BUYER, along with interest.

(vi) To cancel all or any other Contracts with the BIDDER. The BIDDER shall be liable to pay compensation for any loss or damage to the BUYER resulting from such cancellation/rescission and the BUYER shall be entitled to deduct the amount so payable from the money(s) due to the BIDDER.

(vii) To debar the BIDDER from participating in future bidding processes of the UCO Bank for a minimum period of five years, which may be further extended at the discretion of the BUYER.

(viii) To recover all sums paid in violation of this Pact by BIDDER(s) to any middleman or agent or broker with a view to securing the contract.

(ix) In cases where irrevocable Letters of Credit have been received in respect of any contract signed by the BUYER with the BIDDER, the same shall not be opened.

(x) Forfeiture of Performance Bond in case of a decision by the BUYER to forfeit the same without assigning any reason for imposing sanction for violation of this Pact.

6.2 The BUYER will be-entitled to take all or any of the actions mentioned at para 6.1(i) to (x) of this Pact also on the Commission by the BIDDER or any one employed by it or acting on its behalf (whether with or without the knowledge of the BIDDER), of an offence as defined in Chapter IX of the Indian Penal code, 1860 or Prevention of Corruption Act, 1988 or any other statute enacted for prevention of corruption.

6.3 The decision of the BUYER to the effect that a breach of the provisions of this Pact has been committed by the BIDDER shall be final and conclusive on the BIDDER. However, the BIDDER can approach the Independent Monitor(s) appointed for the purposes of this Pact.

7. Fall Clause

7.1 The BIDDER undertakes that it has not supplied/is not supplying similar product/systems or subsystems at a price lower than that offered in the

present bid in respect of any other Ministry/Department of the Government of India or PS U and if it is found at any stage that similar product/systems or sub systems was supplied by the BIDDER to any other Ministry/Department of the Government of India or a PSU at a lower price, then that very price, with due allowance for elapsed time, will be applicable to the present case and the difference in the cost would be refunded by the BIDDER to the BUYER, if the contract has already been concluded.

8. Independent Monitors

8.1 The BUYER has appointed Independent Monitors (hereinafter referred to as Monitors) for this Pact in consultation with the Central Vigilance Commission (Names and Addresses of the Monitors to be given).

8.2 The task of the Monitors shall be to review independently and objectively, whether and to what extent the parties comply with the obligations under this Pact.

8.3 The Monitors shall not be subject to instructions by the representatives of the parties and perform their functions neutrally and independently.

8.4 Both the parties accept that the Monitors have the right to access all the documents relating to the project/procurement, including minutes of meetings.

8.5 As soon as the Monitor notices, or has reason to believe, a violation of this Pact, he will so inform the Authority designated by the BUYER.

8.6 The BIDDER(s) accepts that the Monitor has the right to access without restriction to all Project documentation of the BUYER including that provided by the BIDDER. The BIDDER will also grant the Monitor, upon his request and demonstration of a valid interest, unrestricted and unconditional access to his project documentation. The same is applicable to Subcontractors. The Monitor shall be under contractual obligation to treat the information and documents of the BIDDER/Subcontractor(s) with confidentiality.

8.7 The BUYER will provide to the Monitor sufficient information about all meetings among the parties related to the Project provided such meetings could have *an* impact on the contractual relations between the parties/The parties will offer to the Monitor the option to participate in such meetings.

8.8 The Monitor will submit a written report to the designated Authority of BUYER/'Secretary in the Department/ within 8 to 10 weeks from the date of reference or intimation to him by the BUYER / BIDDER and, should the occasion arise, submit proposals for correcting problematic Situations.

9. Facilitation of Investigation

In case of any allegation of violation of any provisions of this Pact or payment of commission, the BUYER or its agencies shall be entitled to examine all the documents including the Books of Accounts of the BIDDER and the BIDDER shall provide necessary information and documents in English and shall extend all possible help for the purpose of such examination.
